EIGHTH EDITION.

J. T. WAGNER, SALES AGENT, No. 108 Chambers St., New York City.

NUMBER 6, "E"

INTRODUCTION.

THE perfection we have attained in the modeling and manufacture of Sheet Metal Ornaments enables me to present, and guarantee to Architects and the Trade at large, an almost endless variety of Stamped Metal Ornaments, superior both as to perfection of modeling and detail in manufacture to any heretofore placed on the market, and in offering this my Sixth Edition Ornament Catalogue, do so, confident that my endeavors to make the best and most artistic work will be appreciated by all interested in best work in Architectural Ornamentation.

TO ARCHITECTS.

In my employ I have a corps of skilled Sculptors and Modelers, and at any time any Architect will send drawings of Special Ornamental Work, I will be pleased to have plaster models made and submit same with estimate of cost of work for their approval, and guarantee finished work to be equal to, if not superior, to plaster models; no charge will be made for this work, unless it is satisfactory and accepted, and I most respectfully invite correspondence.

TO CORNICE MANUFACTURERS.

Realizing the delays experienced by Cornice Manufacturers, and the fact that often they cannot get drawings of work until it is almost wanted, and therefore cannot always anticipate their wants for Sheet Metal Ornaments, has induced me to increase my facilities for manufacturing, placing me in a position to execute orders promptly for special work, and enable me to carry in stock a very large line of regular Catalogue Work, so as to be prepared to ship ordinary orders promptly on their receipt. My facilities for executing work promptly, will be realized, when I state that my plant is fully five times as large as that of any other Manufacturer of Architectural Ornaments in the United States, and fully double the capacity, of any other Manufacturer in the same line of work in the world. On all special work other than shown in Catalogue, I will be pleased to make estimates and quote prices, and will at all times guarantee prices as low as consistent with character of work wanted.

CHEAP SHEET METAL ORNAMENTS.

To meet a class of competition which has recently arisen in the West, we have thought it best to show a line of work made to meet this demand, and will guarantee this line of Ornaments to be in every way superior to the work made by the parties referred to, and good first class work in every respect, but made in light relief, and of light ganges of sheet metal. When in the want of best work I do not advise the use of this line of Ornaments, but when cheap work to meet competition is wanted, they are just the thing. Send in your orders and be convinced.

COPPER WORK.

The use of Ornamental Copper Work has increased very rapidly during the past few years, and to meet this demand I have recently gone to heavy expense in fitting up for the manufacture of Ornaments from this metal, and I am now prepared to make Copper Ornaments, perfect in workmanship, and beautifully cleaned and finished, to correspond in color and finish to cold rolled and planished copper work, on which this class of ornamental work is generally used. The cost of copper entering into these ornaments is so great, and the demand for Copper Ornaments as yet comparatively so limited, I have not felt justified in carrying them in stock, and therefore have not listed them in my Catalogue, but will be pleased to quote prices at any time my customers may desire. Until such a time as the demand for Copper Ornaments justifies and they can be manufactured in quantities, and carried in stock, it will be almost impossible to name any price for them, based on present list prices for Zinc Ornaments, that would be of any service to the Cornice Manufacturer in preparing his estimates of cost of Copper Ornaments. The reason for this is, that at present, the price of Copper Ornaments must vary according to the quantity wanted, owing to the fact that the labor of preparing and setting dies, forces, &c., is the same for a small, as for a large number of any given design of ornaments, and if charged to making a small number, must necessarily make them cost much more in proportion than if this same labor of setting dies, &c., was distributed among a large number, hence I always advise, and would prefer if possible, for customers to write or telegraph for estimates on Copper Work before quoting prices on it, or before ordering.

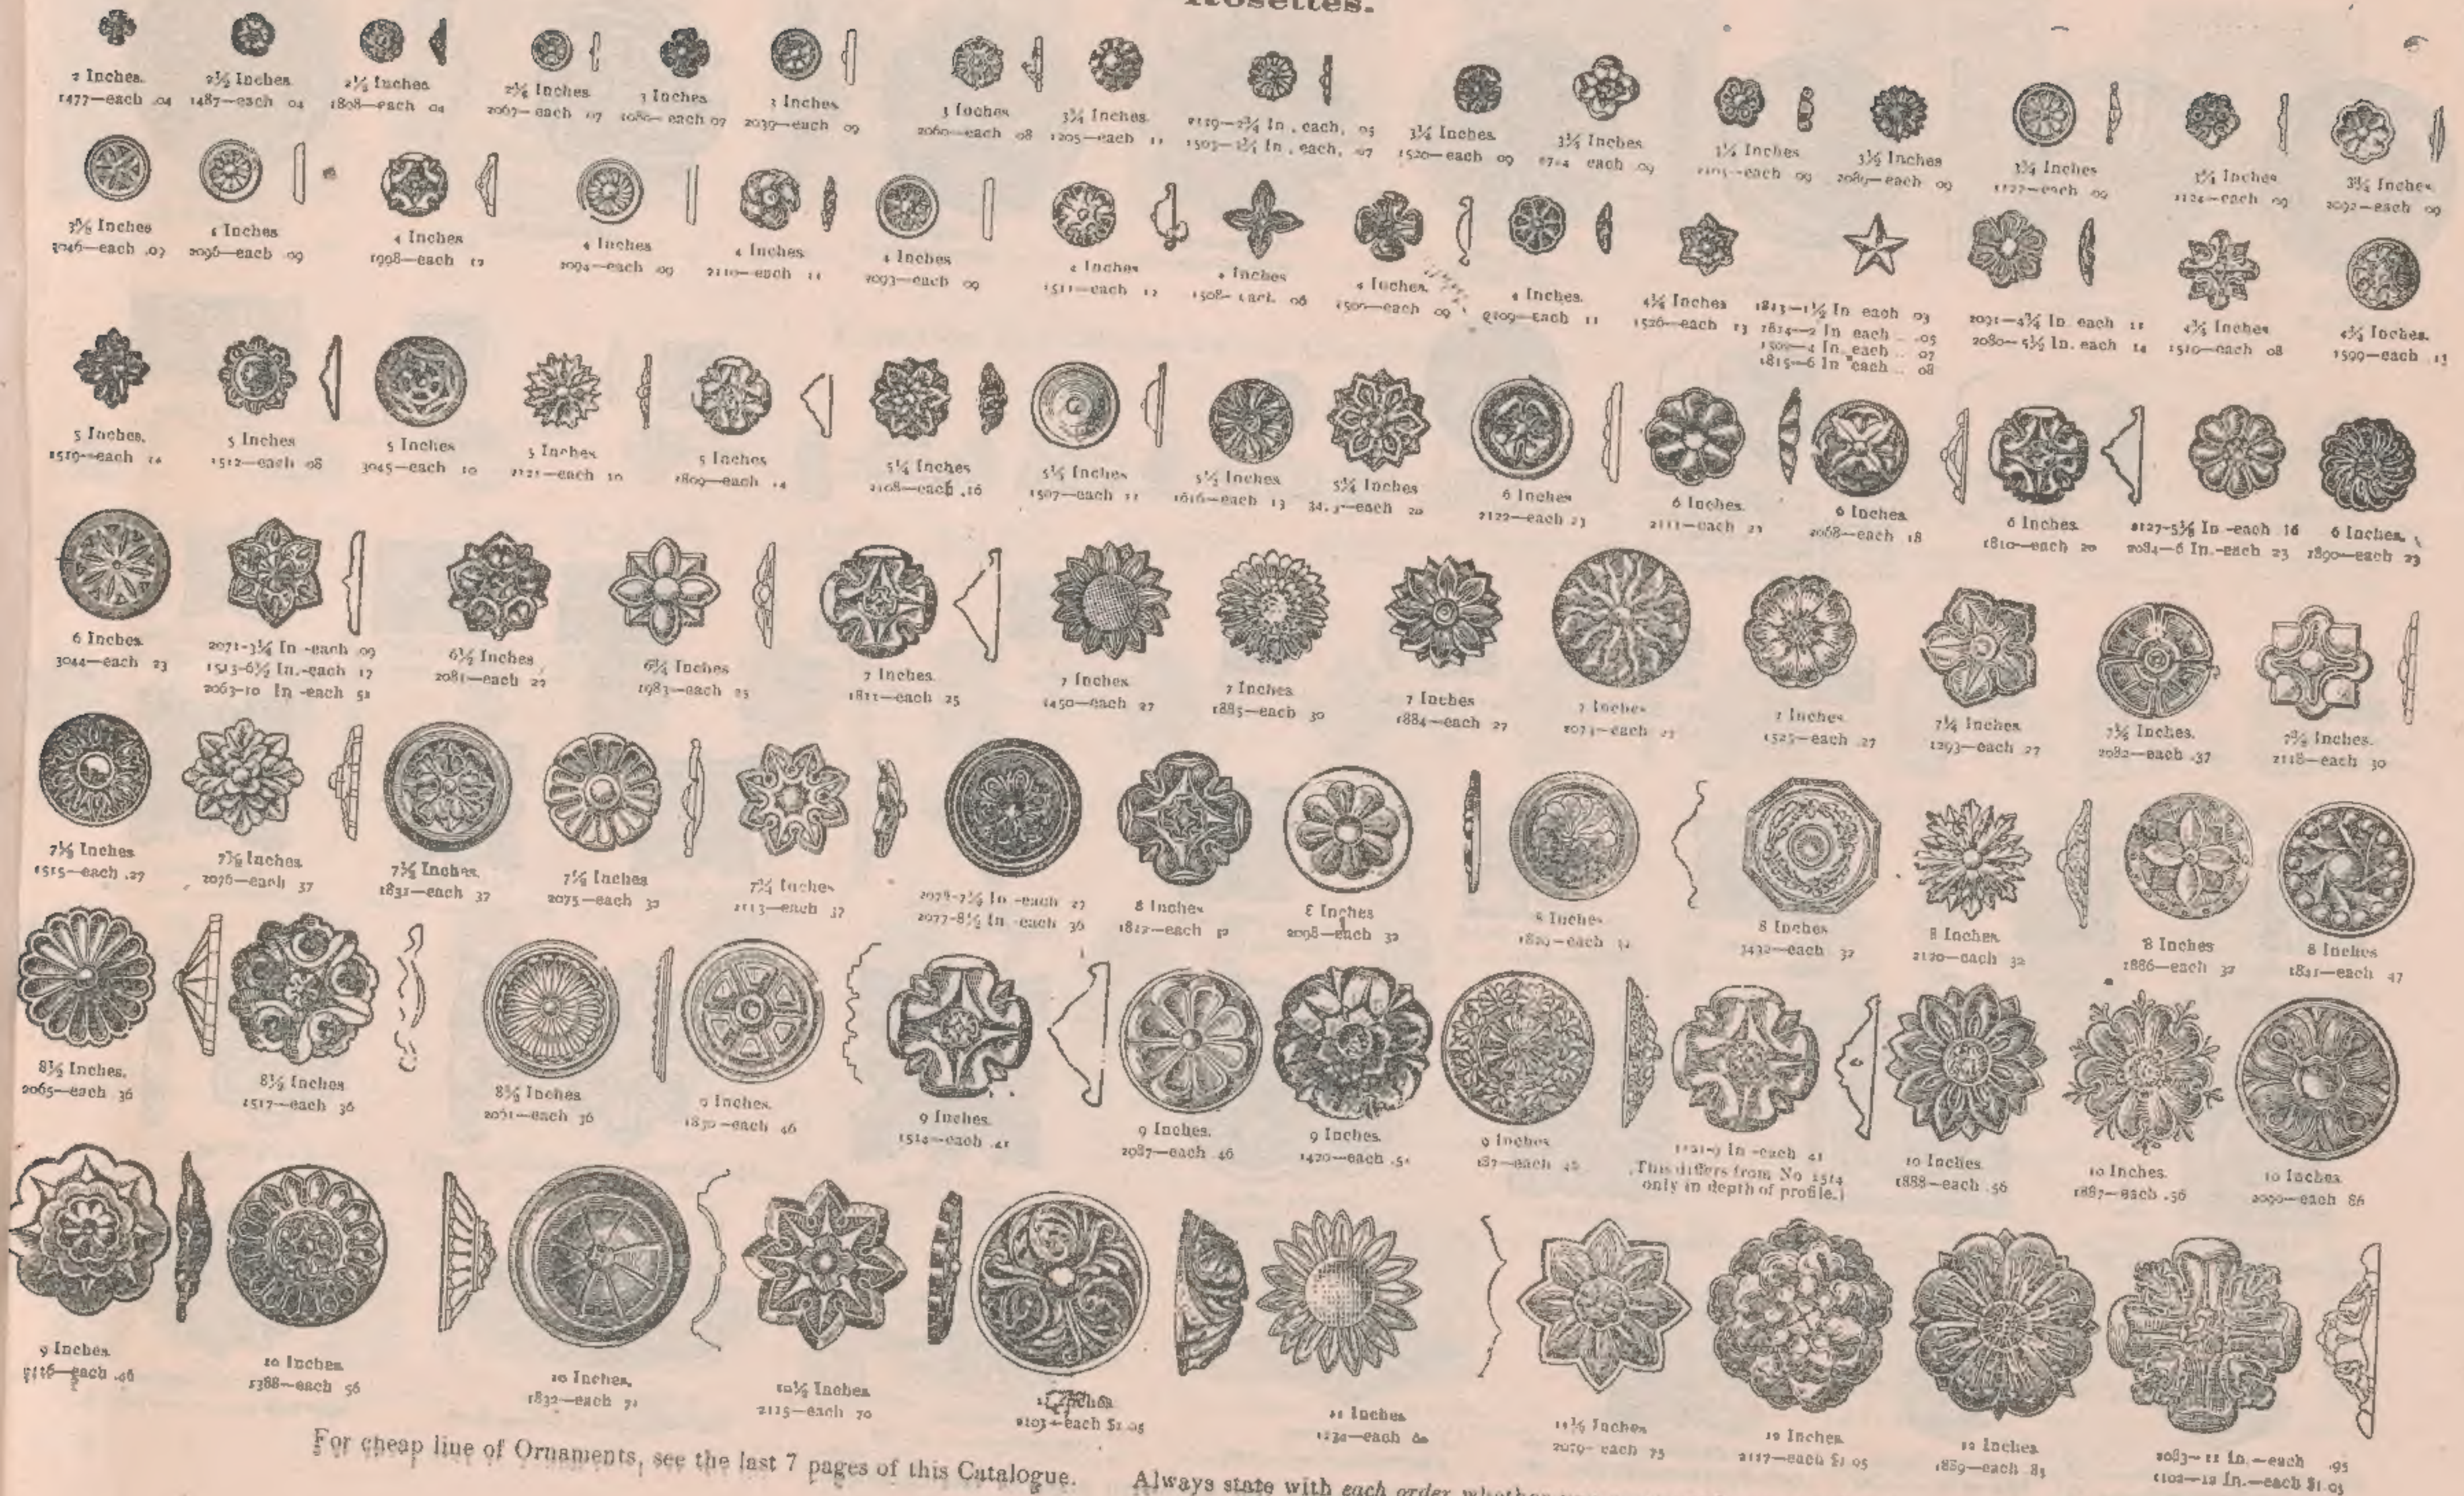

EASTERN AGENCY

For the accommodation and convenience of my Eastern Customers and Export Trade, I have established a branch Office and Ware-room at No. 108 Chambers St., New York City, Mr. J. T. Wagner, Sales Agent, where a full line of samples and a large stock of regular Catalogue Work will be found. Architects and those interested in Architectural Ornaments are invited to call and examine samples.

In ordering by telegraph, always use the telegraphic cipher which will be found in connection with the index in the back of this book. In ordering always state whether you wish goods sent by Freight or Express; failure to do this, will cause delay in shipment. The prices quoted in this Catalogue are based on work made in sheet zinc. Prices quoted for work made in copper or brass on application. Will always be prepared to furnish designs made by other Manufacturers at same prices for same character of work. All prices in this Catalogue subject to a discount to the Trade which will be arranged by correspondence. Should Catalogue not contain designs approximating closely enough with what you require, send drawings or sketch showing what you want, for it is possible that among our large number of special dies, we may have something that will answer your purpose; and will save you the cost of modeling.

W. H. MULLINS, SALEM, OHIO. U. S. A.

Rosettes.

I have a large number of designs of hands and feet not shown in this catalogue. Should you not find one you want, please send me a sketch of the hand and size of what you require, and I can probably approximate closely enough from designs on hand. Always state with each order whether you want your work by parcel or express.

Sheet Metal Statuary.

IN this department great advancement has been made, and a grade of highest ART WORK attained, which a few years ago would have been regarded as impossible to accomplish in this material, and I now guarantee artistic work in sheet metal statuary, which, while it can be sold at a very much lower price, will compare most favorably as to modeling and execution with the finest cast metal work. The principal advantages claimed for sheet metal statuary are its lightness, cheapness, great durability, and its peculiar fitness and adaptability for ornamentation in architecture. The statue of Hermann, cut of which is shown on page 55 of the catalogue, was made by me for a monument at New Ulm, Minnesota, and is the largest and most imposing sheet metal statue ever made in this country, and has attracted great attention here and abroad. This statue is made of sheet copper ranging in gauge from 20 ounces to 48 ounces, all joints being countersunk and riveted, and the copper work stiffened and supported with a light frame work of steel Ts and angles, all securely interlaced and riveted, making at the same time an extremely light and strong construction, the former demonstrated by the fact that this statue, while 32 feet in height, weighs only about three thousand pounds. The Hermann statue is the second largest statue ever erected in the United States, the Bartholdi Liberty (which was made in France) alone being larger. This statue will demonstrate to Architects and others the class of work I am prepared to furnish. Parties ordering statues from me, where special designs are to be made, may be confident of getting work perfect as to modeling and execution, and of having their wishes carried out in detail; and I will be pleased at any time to model and submit small plaster sketch or model of statues for the criticism and approval of parties ordering, no charge for so doing to be made unless design is satisfactory.

The prices for statuary named in this catalogue, as also for all ornaments priced in it, are based on making them of sheet zinc, which is the cheapest material that can be used, but where more durable and artistic work is wanted we would strongly recommend the use of sheet bronze or copper, and will be pleased, on application, to price work made in either of these materials.

W. H. MULLINS, SALEM, OHIO, U. S. A.

Stamped Zinc Ceiling Center Pieces.

69

Stamped sheet metal work, as used for Ceiling Center Pieces, possesses great advantage over the heavier and more expensive stucco and cast work, which will at once recommend it to those in ornamentation of this character.

The principal advantage claimed for Sheet Metal Center Pieces is the extremely low price at which they can be sold, beauty of finish, durability, and the fact that they may be shipped without danger of breakage.

These Centers are all finished before leaving the factory, and painted a lustreless white to correspond with plaster finish of ceiling and are priced in this way. They can, however, be painted and ornamented to suit the taste of purchasers, and to correspond with style and decoration of room where used. These Centers are simply screwed to the ceiling after plastering is put on, and can at any time be taken down, cleaned and replaced without damage to the ceiling or Center Piece.

The prices given are for Center Pieces finished a beautiful white ready to put up, and delivered carefully boxed or crated on cars at Salem. Necessary white headed screws together with a small vial of paint and hair pencil will be furnished with each shipment of Center Pieces, to be used in retouching should they become soiled in fastening up. Correspondence solicited. Always state whether work is to be sent by Express or Freight.

IN STYLE AND FINISH THESE GOODS ARE WITHOUT EQUALS IN THE MARKET

93

Spun and Machine Made Balls.

Bracket & Modillion Rolls.

Spun Balusters.

I have added to the assortment of balls heretofore manufactured, a line of copper, and leaded iron machine made half balls, which will be found superior to anything in the market, and at prices very much lower than it is possible to make spun balls. These machine made balls will be found much superior to zinc balls for use in architectural work, for the reason that they are much stronger and stiffer than spun balls.

Machine made balls not made larger than 6" in diameter.

New Designs of Cresting and Cresting Blocks.

The Crestings and Cresting Blocks shown herewith are entirely new and original in design, and are made of stamped crimped iron or zinc, being stamped in two plates, soldered or riveted together, shipped either separately as Cresting Blocks ready to be applied to the ordinary 2" ridge roll, or made up as Crestings as shown in design No. 3726. These designs of Crestings and Cresting Blocks are intended to meet the requirements of the Contractor, Builder and Roofer for a cheap ornamental ridge cresting, and will be found to be the cheapest and most artistic cresting that has ever been offered to the trade. In using these cresting blocks it is not necessary that they should be soldered to the ridge roll, but simply slipped over the end of the roll before placing it in position on the roof, and after spacing them as required, nail through the lower flange to the ridge pole, using a small slender wire nail for this purpose. In using them in this way the nail used in fastening the cresting blocks also answers the purpose of holding the ridge roll in position on the roof and does not necessarily add any additional nail holes other than would be used in applying ridging in the ordinary way.

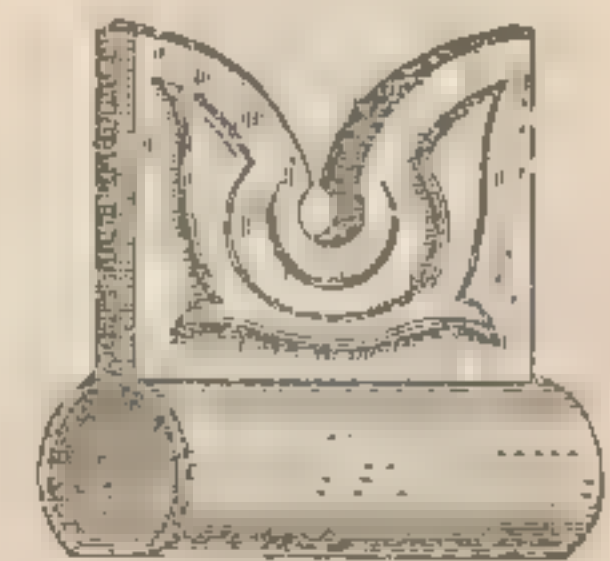

The finials or terminals shown on page 101 are used in connection with the cresting and cresting blocks as terminals on the end of cresting.

Sheet Steel Ceilings.

My facilities for furnishing Artistic Sheet Metal Ceilings are probably unequalled. Combining with my new and artistic designs of Embossed Steel Ceilings thousands of Stamped Metal Ornaments suitable for ceiling ornamentation, gives me a variety to select from possessed by no other manufacturer.

I furnish all kinds of Steel Ceilings, from the cheap corrugated iron ceiling to the deep, bold and magnificent galvanized iron ceilings, enriched with heavy stamped zinc ornaments, suitable for large court rooms, halls, etc.

If intending purchasers will send me the floor plan of the rooms for which they wish ceilings, showing exact location of elevator, stair openings, or other offsets or projections, marked in figured measurements, I will send them a special design to suit their requirements. In sending diagram for estimate always note the exact number of center pieces required, locate as near as possible the position of gas or electric light drops, and always give the distance from top of window casings to the ceiling, so that we will know the extreme depth of cornice to figure on furnishing.

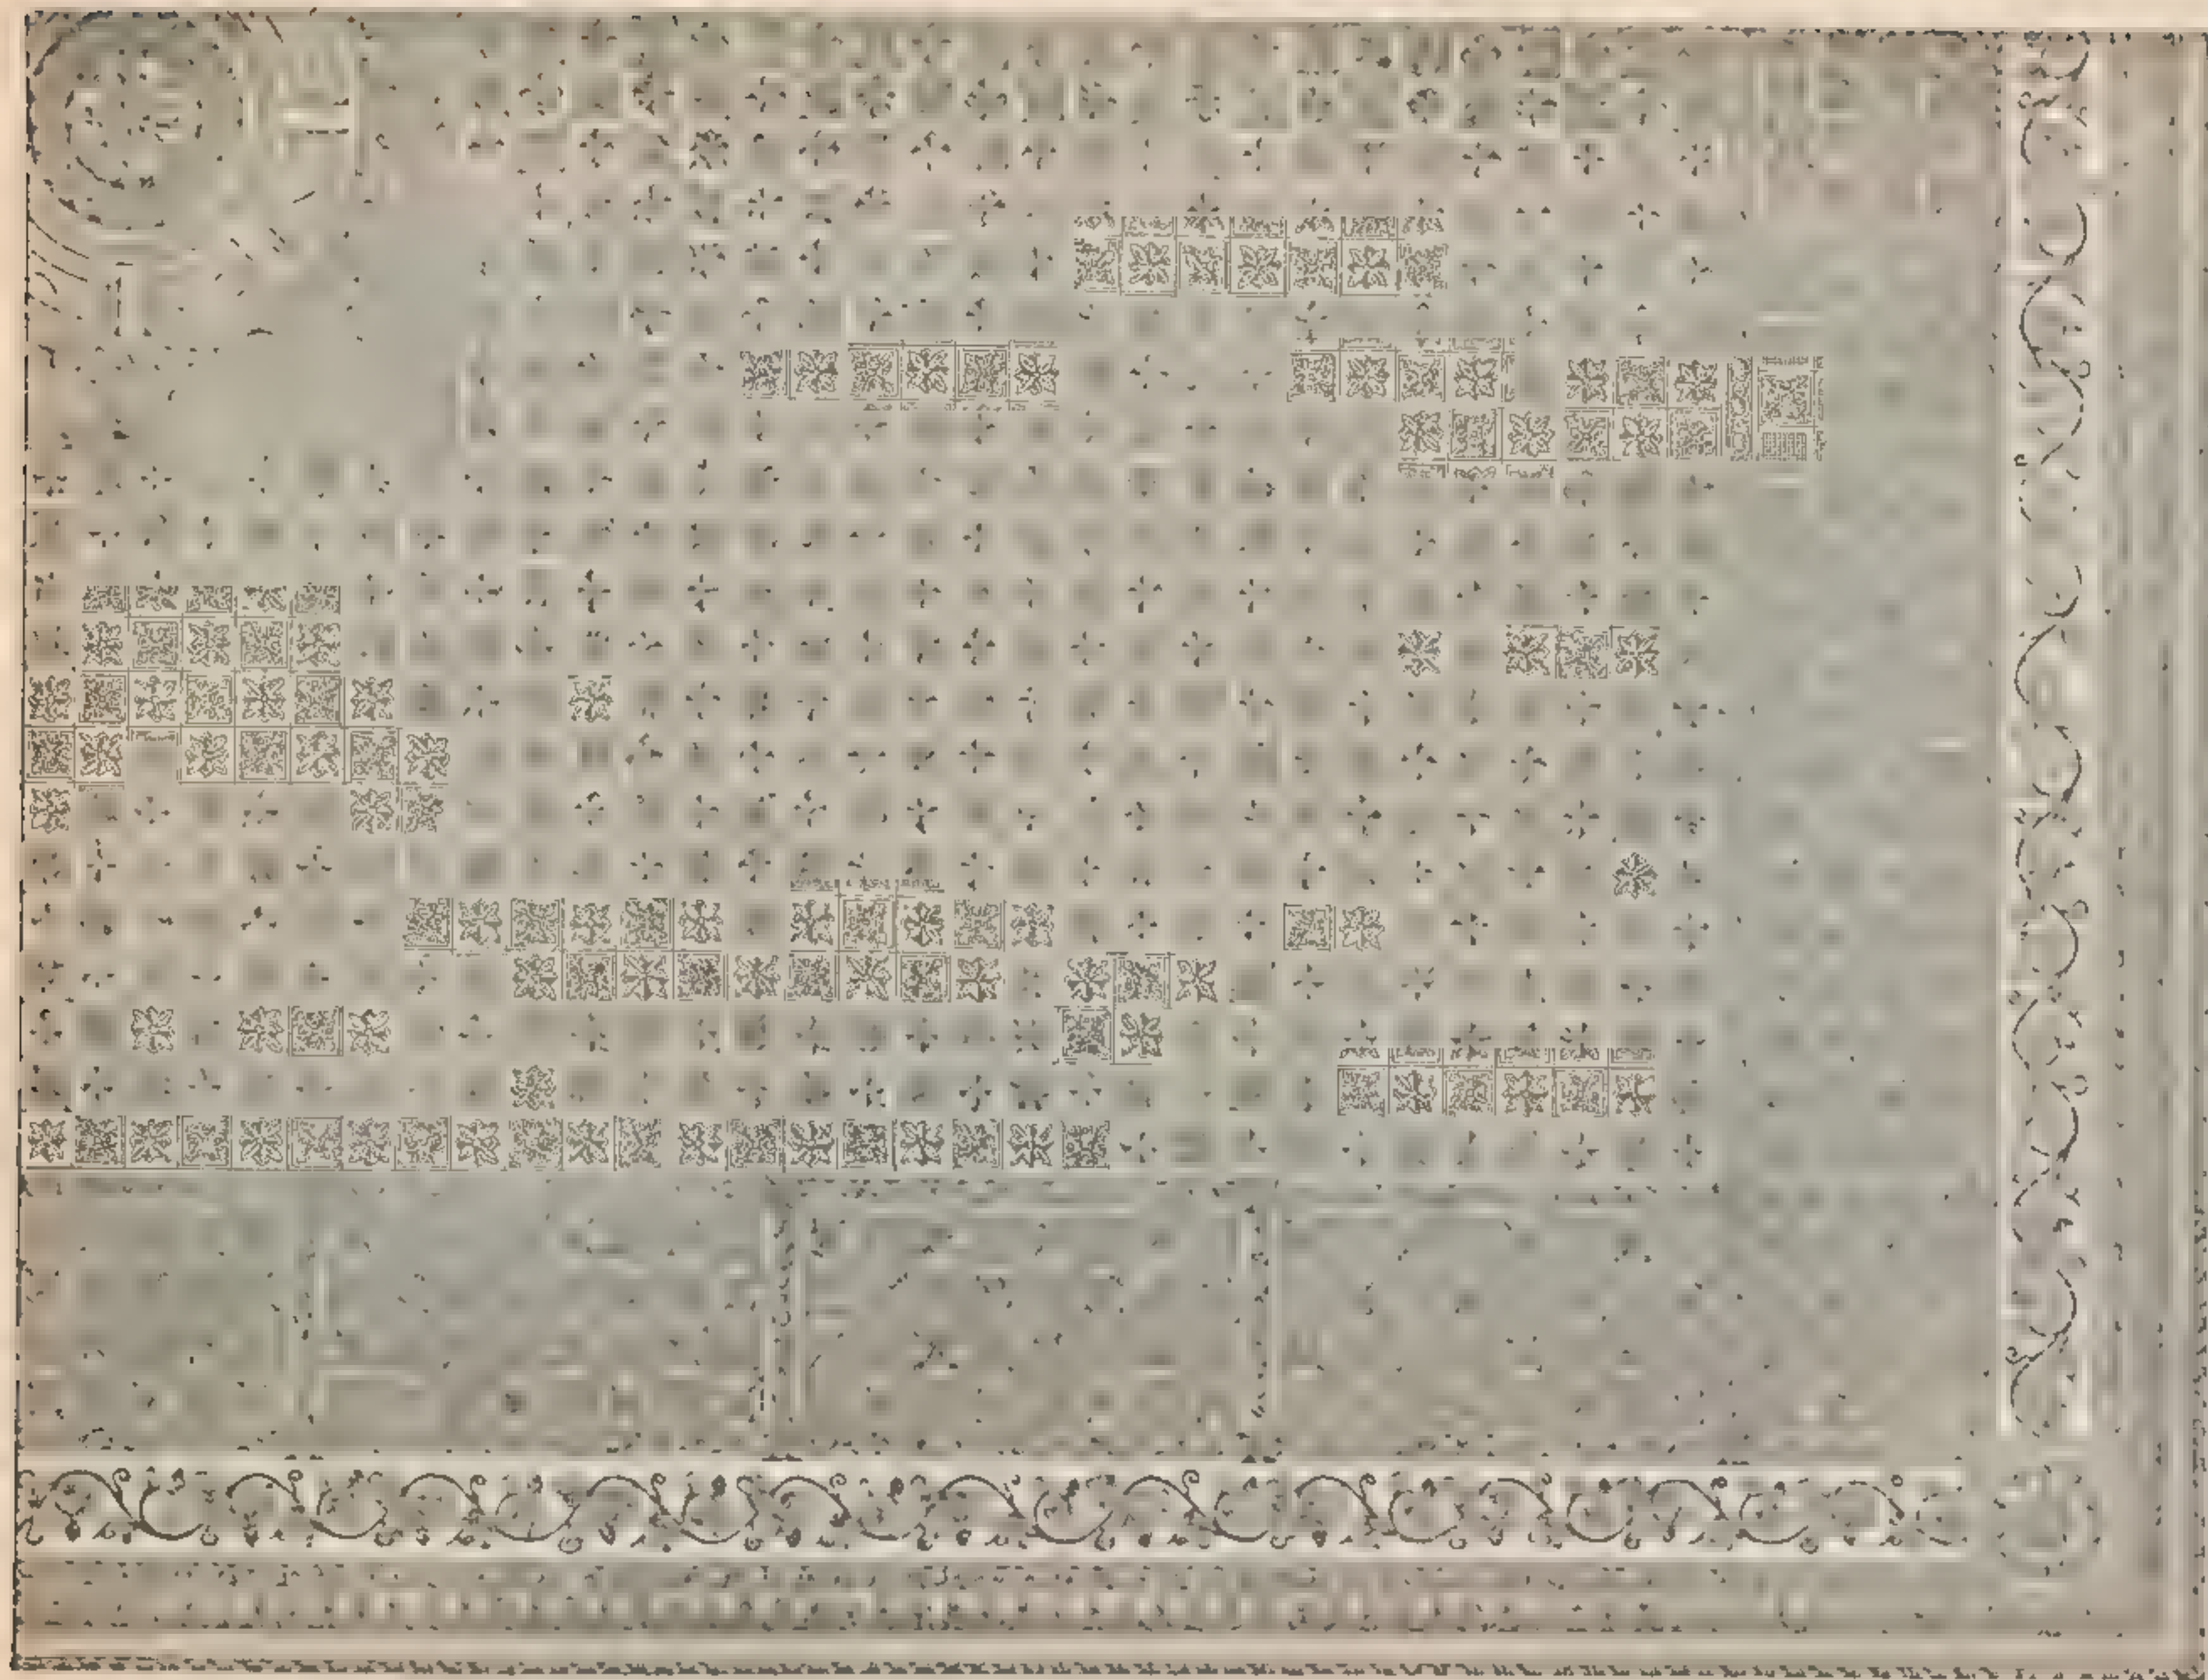

Designs furnished to suit special requirements. Write and get my designs and prices before ordering elsewhere.

The above cut is an enlarged representation of Diagram "E" which forms the body of ceiling, as shown in designs Nos. 7116, 7117 and 7118, and is stamped in steel sheets 24 x 84 inches exclusive of laps.

No. 3010. Galvanized Iron Ceiling, Enriched with Heavy Stamped Zinc Ornaments.

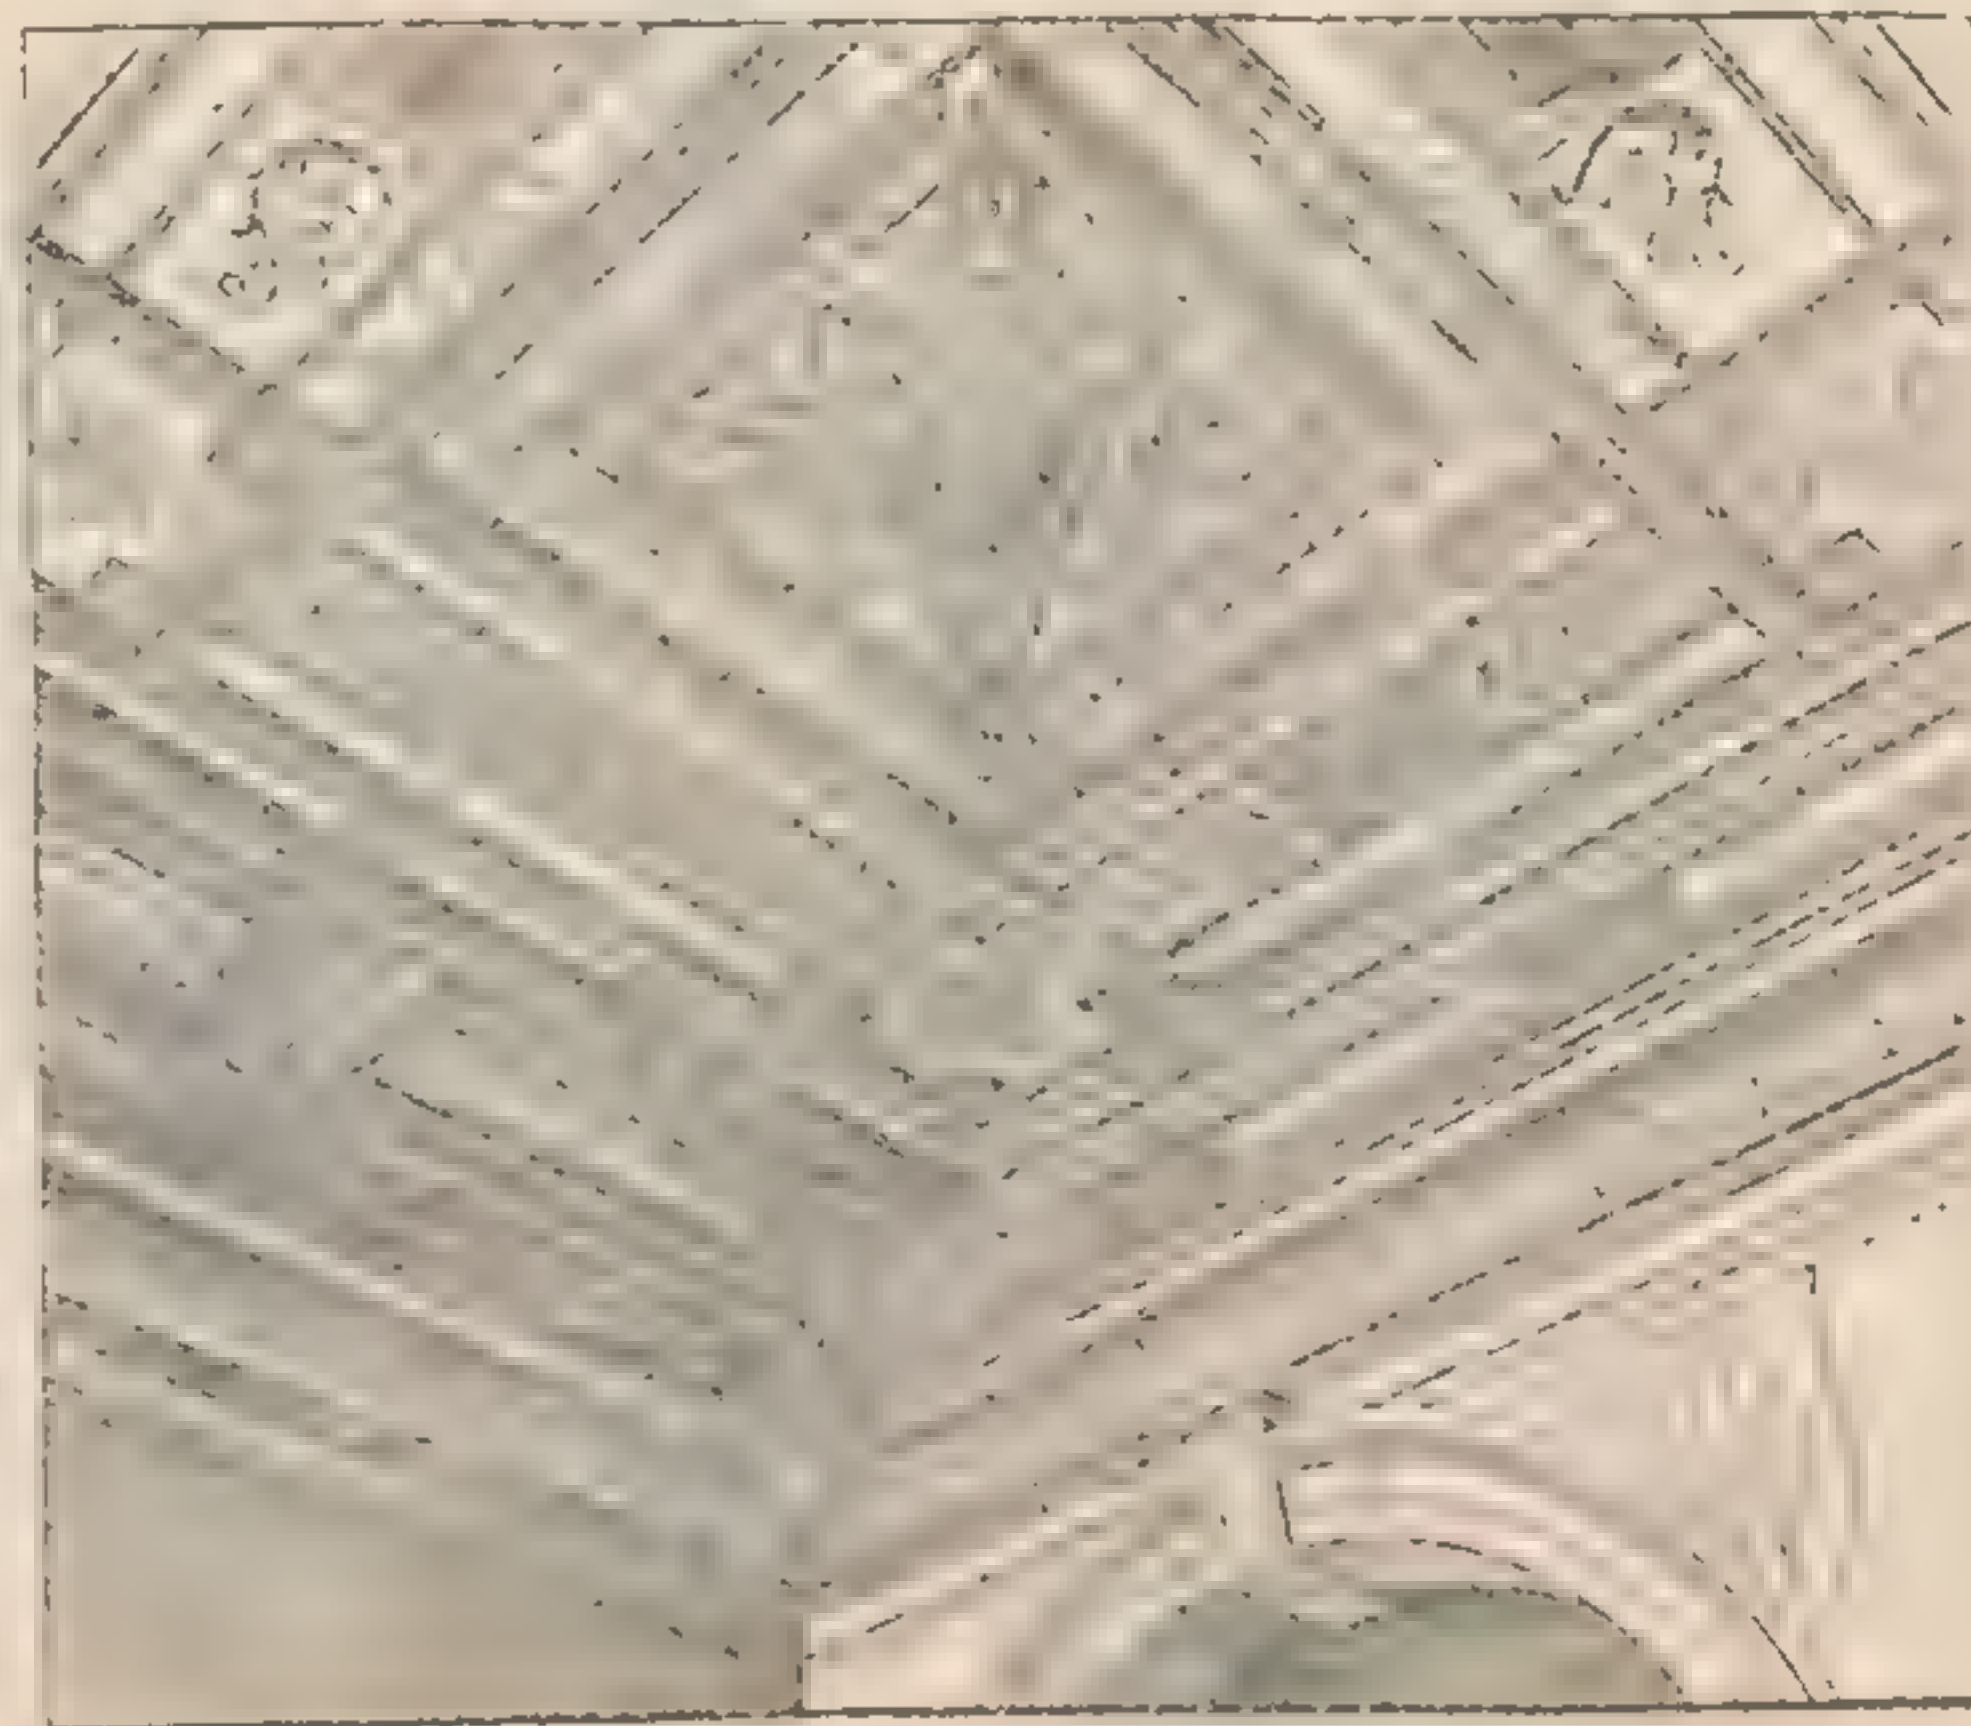

No. 3012. Galvanized Iron Ceiling, Ornamented with Heavy Zinc Ornaments.

Galvanized Iron Ceilings.

Galvanized Iron Ceilings, designs of which are here shown, cannot be made in competition with several styles of Stamped Black Steel and Iron Ceilings now on the market and are not suitable for small rooms or stores, but are intended for use in large rooms, such as Court Rooms, Theatres, Public Halls and Churches. They are cheaper, lighter and much more durable than stucco ceilings and have the decided advantage over the latter of being practically *Fire Proof*.

Estimates furnished on application.

No. 3031. Galvanized Iron Ceiling, Ornamented with Heavy Zinc Ornaments.

W. H. MULLINS, SALEM, OHIO, U. S. A.

Kinnear's Patent Lock-Rib Roofing:

Kinnear's Patent Roofing, of which I am the exclusive manufacturer, is to take the place and entirely supersede the old style standing seam roof, in that it is highly ornamental, cheaply and easily laid, and makes an absolutely storm and water tight roof, and is recommended for use on any roof the pitch of which is steep enough for slate, standing seam tin, iron or shingle roof.

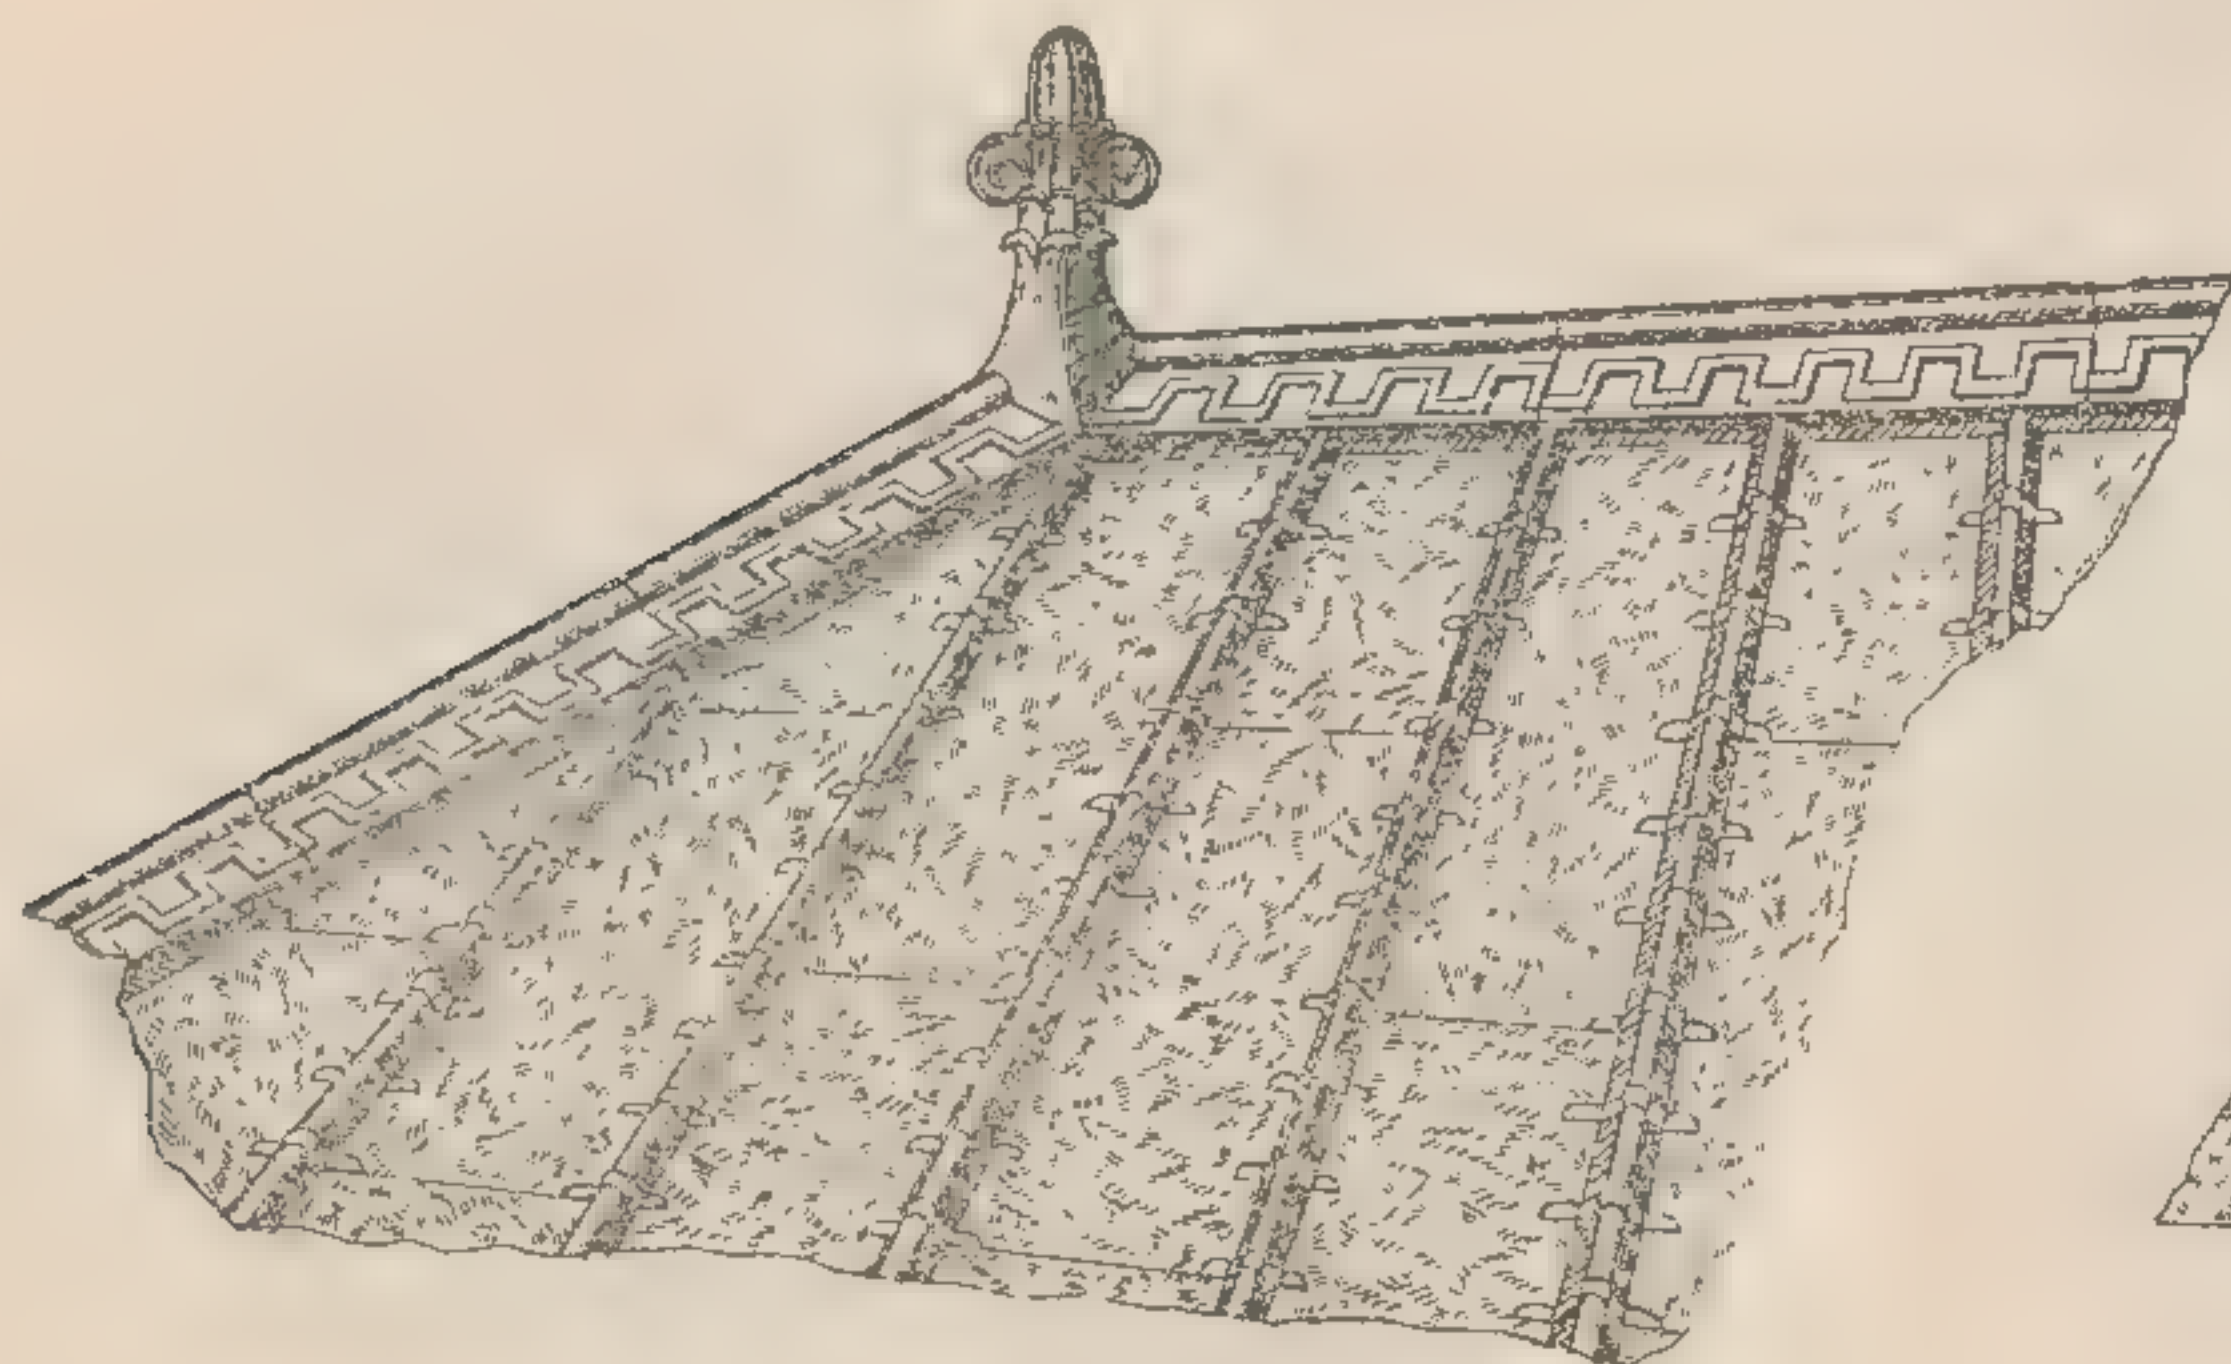

The roof as now made will be furnished in tin, black and galvanized iron, copper and pure aluminum.

As a copper roof it is absolutely the only roof that has ever been produced in which perfect expansion and contraction are provided for. The peculiar shape of the spring lock slide mouldings, the strengthening of same by the ornamental bands, the perfection of the slip joint at the lower edge of the sheet, the ingenious arrangement of the upper end of the sheet to provide against capillary attraction, together with the highly artistic appearance of the roof, will at once recommend it to the Architect and practical Roofer.

Another and very great advantage is that it can be sold at a price that will enable the Roofer to furnish it laid complete, on the roof at a lower cost and greater profit to himself than he could supply a roof of an equal quality of material made in the old way.

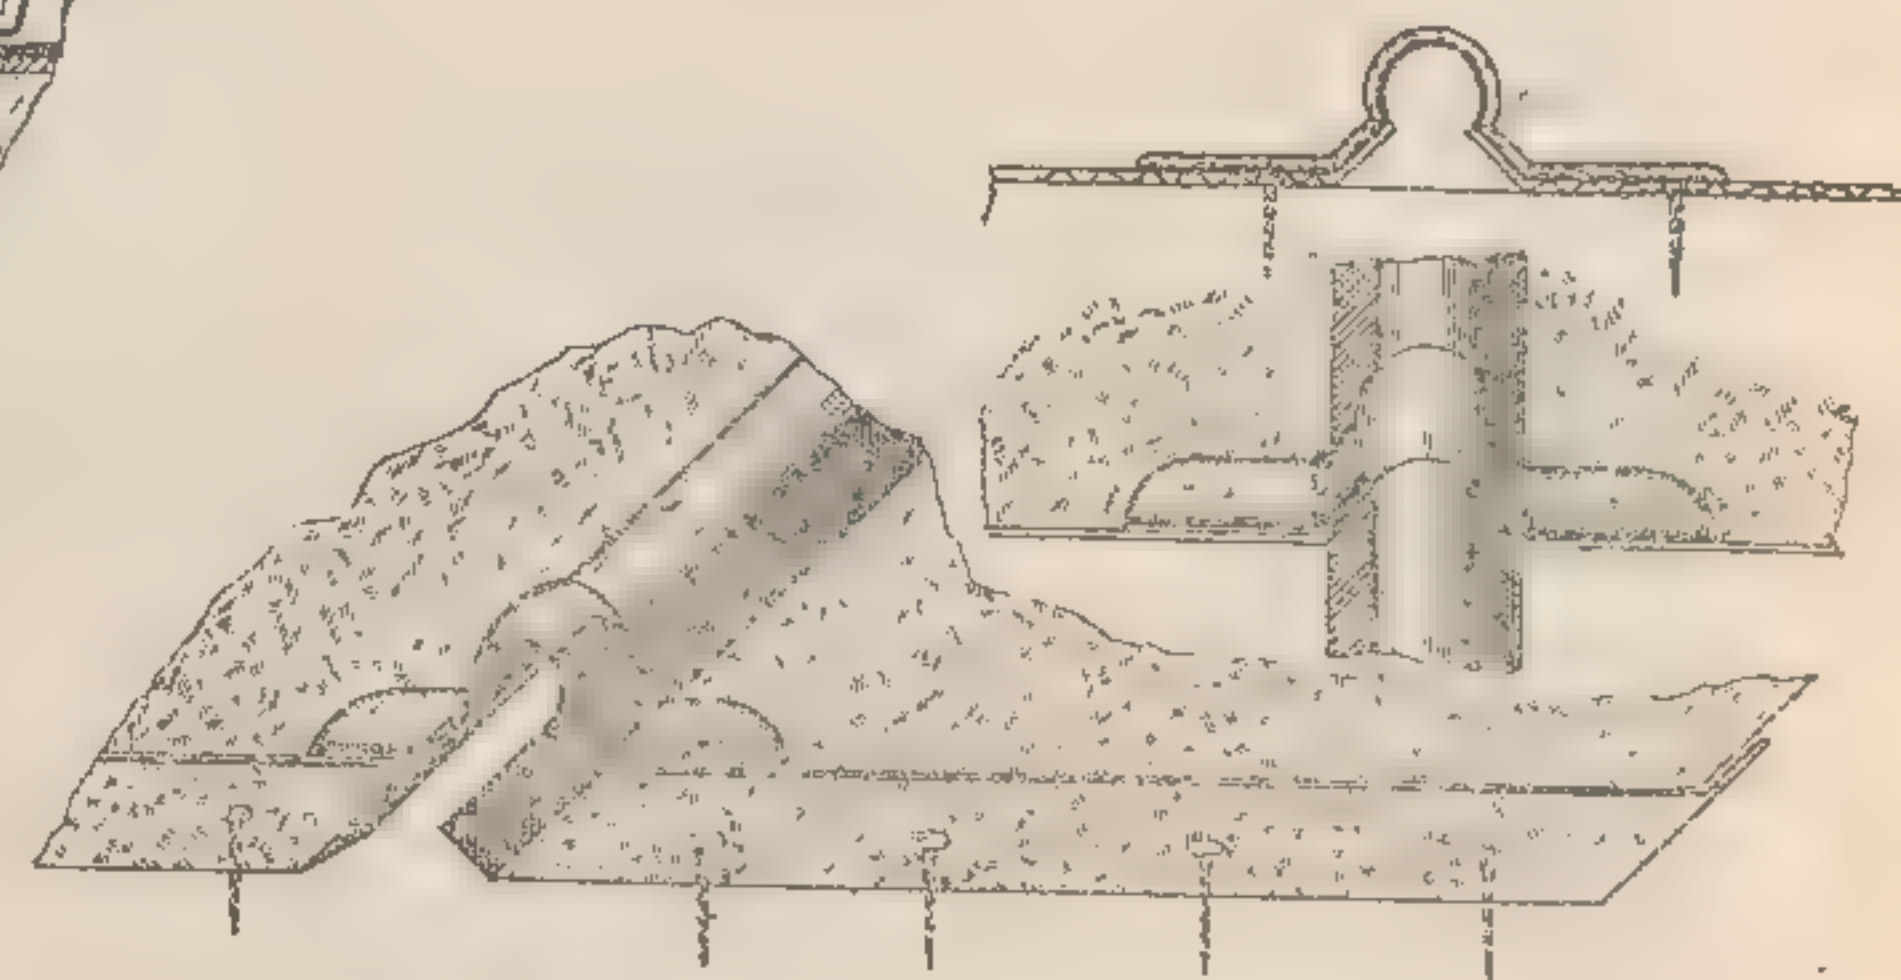

Correspondence with Architects and Roofers invited.

Price list and full particulars on application.

Special sizes manufactured to order of Tin, Galvanized Iron and Copper

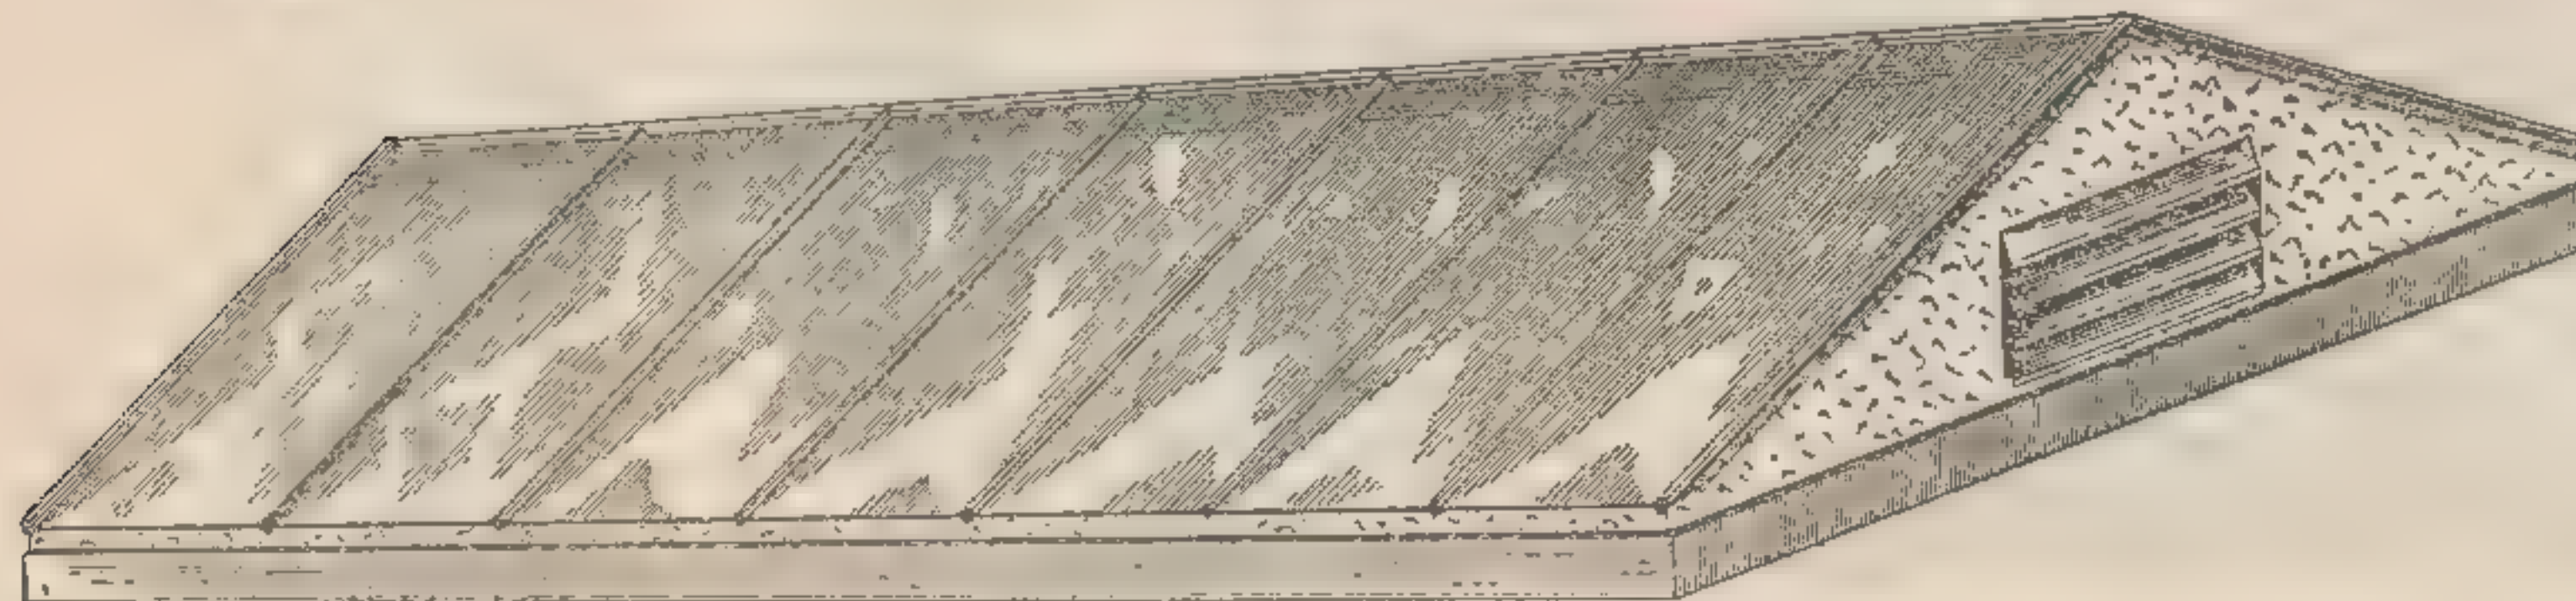

Our Corrugated Iron is all made with dies in the latest and most improved machinery, and we guarantee it to be all made with corrugations uniform in shape and size, so that all sheets will fit perfectly when applied. All Black Corrugated Iron is painted by machinery with best quality metallic paint. Price of Corrugated Iron governed by fluctuations in price of iron and will be quoted on application. We carry in stock all ordinary sizes and gauges, both Black and Galvanized Corrugated Iron. Our price for Corrugated Iron will always be found low as the lowest for corresponding work and material.

Price \$720.00.

No. 71-4 Stamped Rock-face Front.

Galvanized Iron only.

24 feet wide.

This Front is made of Stamped Rock-faced Galvanized Iron, ornamented with best and heaviest stamped zinc work, and is especially designed as a Bank, Office or Store Building. Prices in this catalogue do not include glass, woodwork, hardware, cast or wrought iron work. Prices for any change from catalogue sizes and designs quoted on application. Special prices for Columns and Sills.

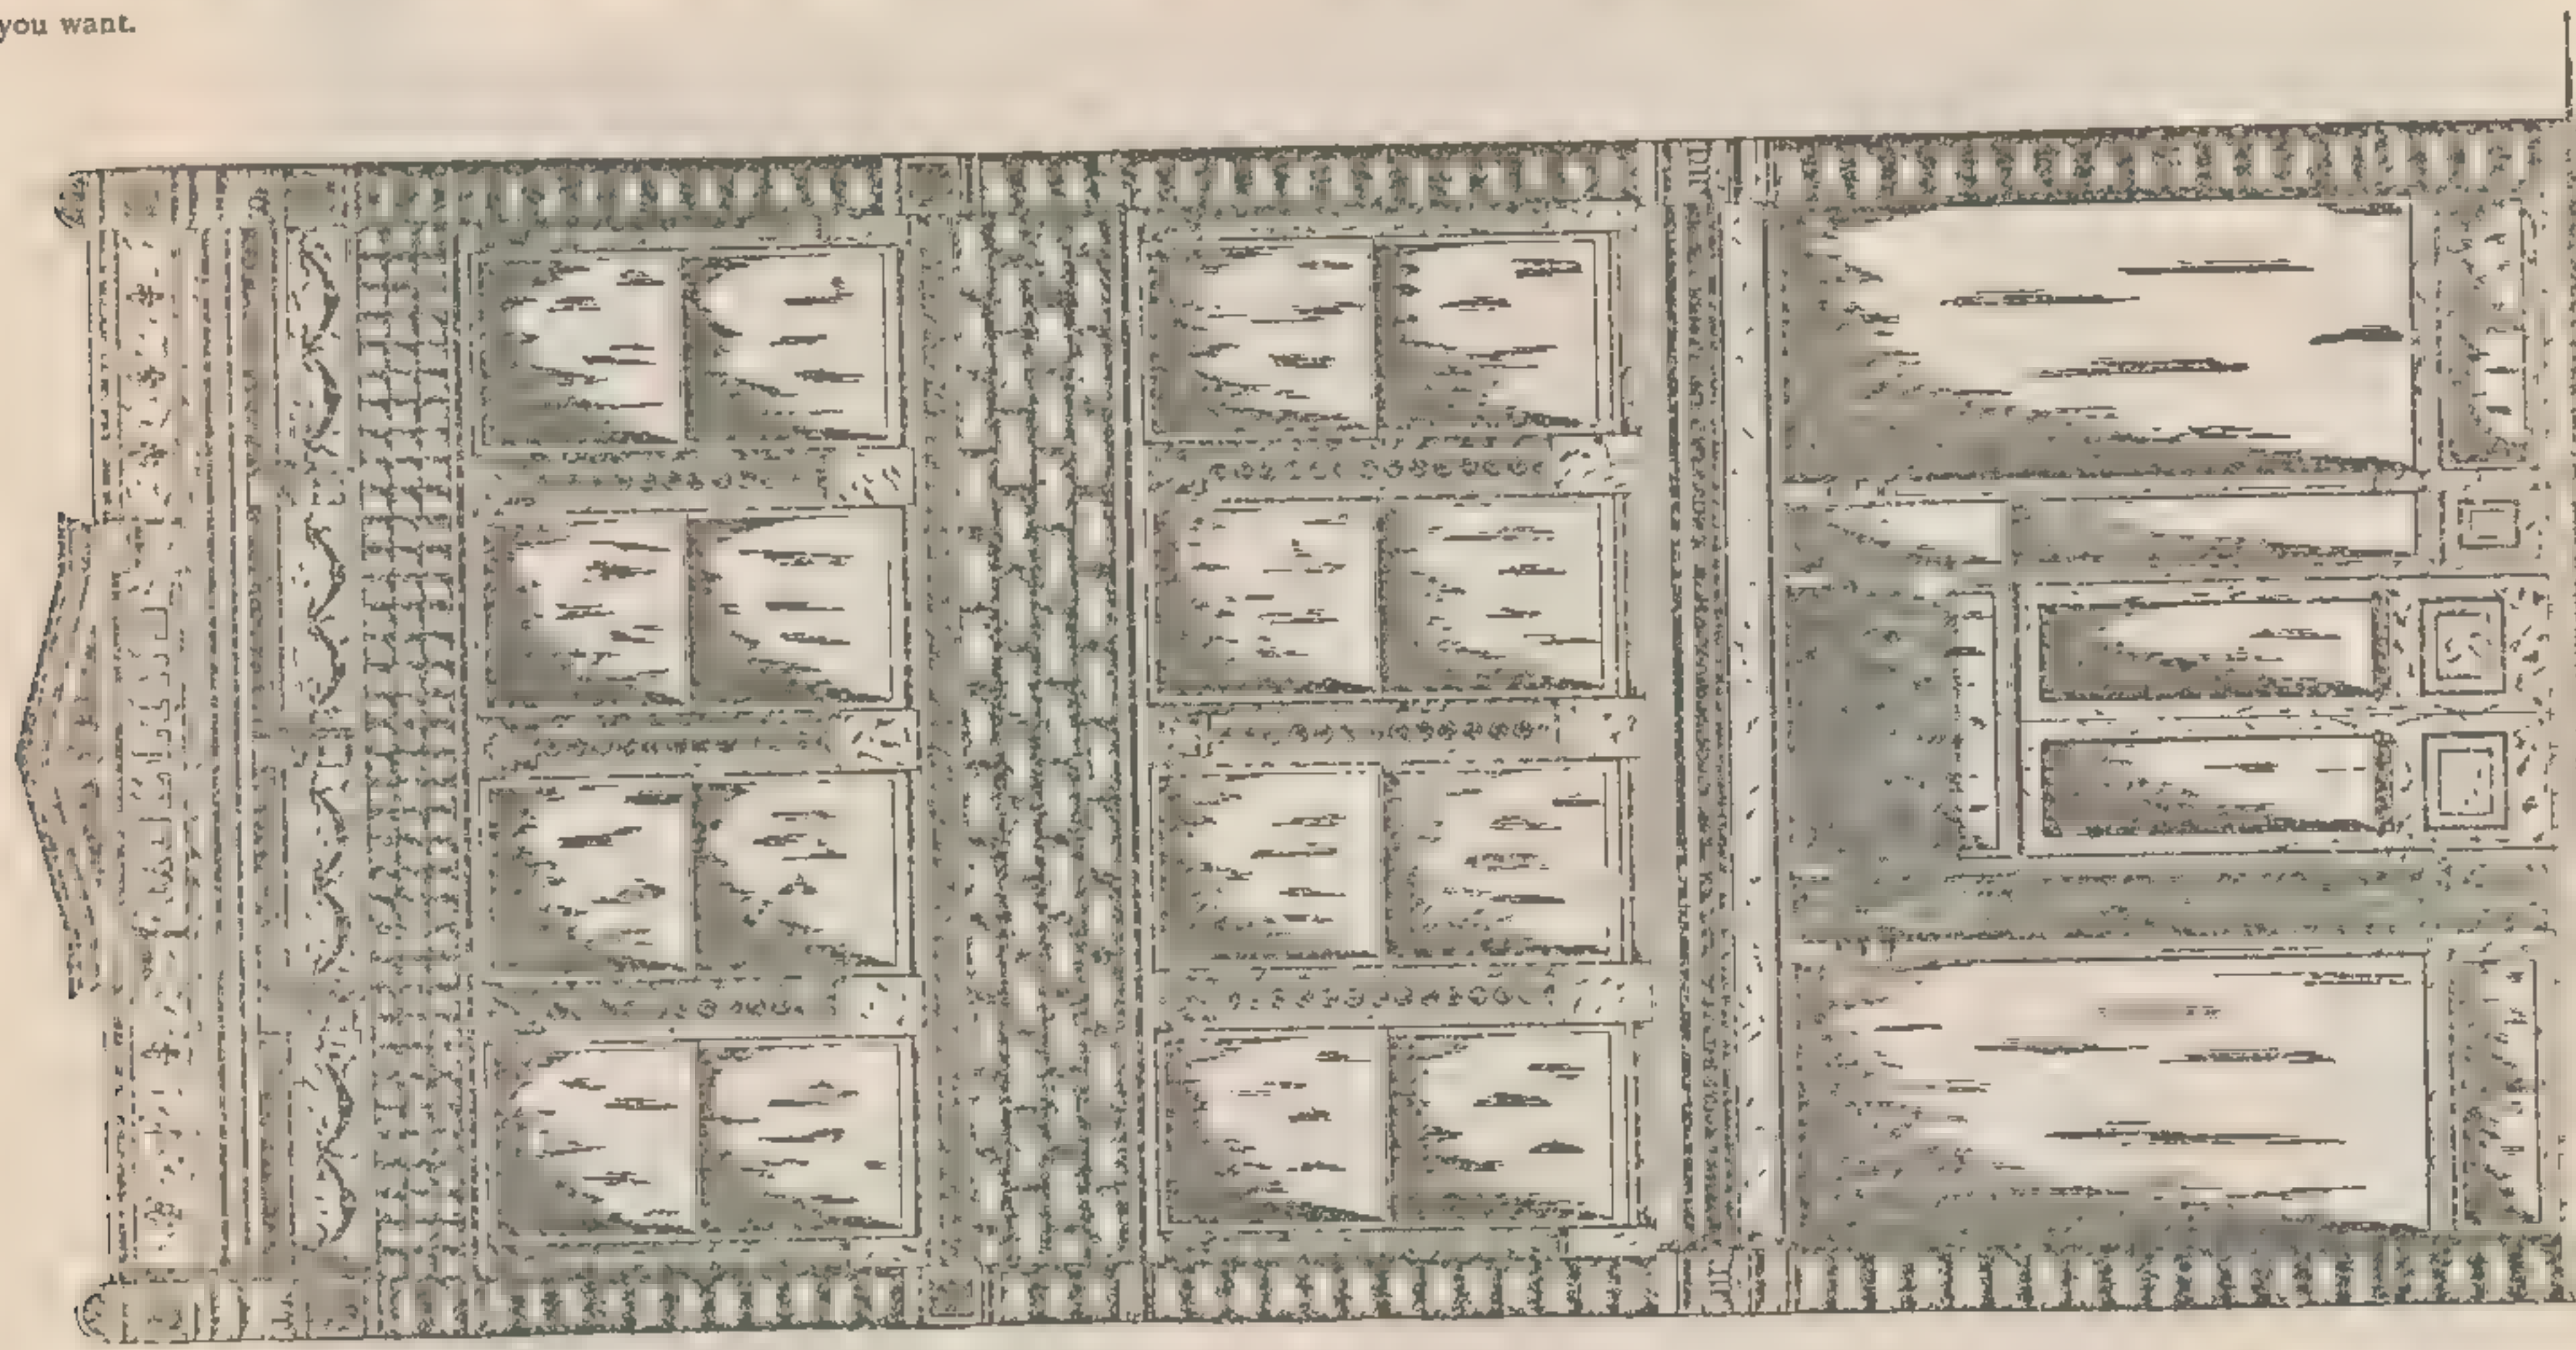

No. 364. Sheet Metal Front.
Galvanized Iron Work only.

Price, \$1,540.00

45 feet wide.

This Front, with its projecting bay windows, which make the upper stories light, airy and cheerful, is a very appropriate design for Office, Residence or Hotel Building, with store rooms below. Size of front can be varied. Write for prices, giving size of your proposed building, and mention number of the design you prefer. All our Fronts are made of best quality Galvanized Iron, securely soldered and riveted in best manner known to the trade.

The sizes of any of the Fronts shown in catalogue can be varied to suit requirements. Special designs of Sheet Metal Fronts will be made if catalogue does not contain what you want. In writing for prices always send plan of your building and state height of stories, thickness of floors, etc. In fact, send full description of just what you want.

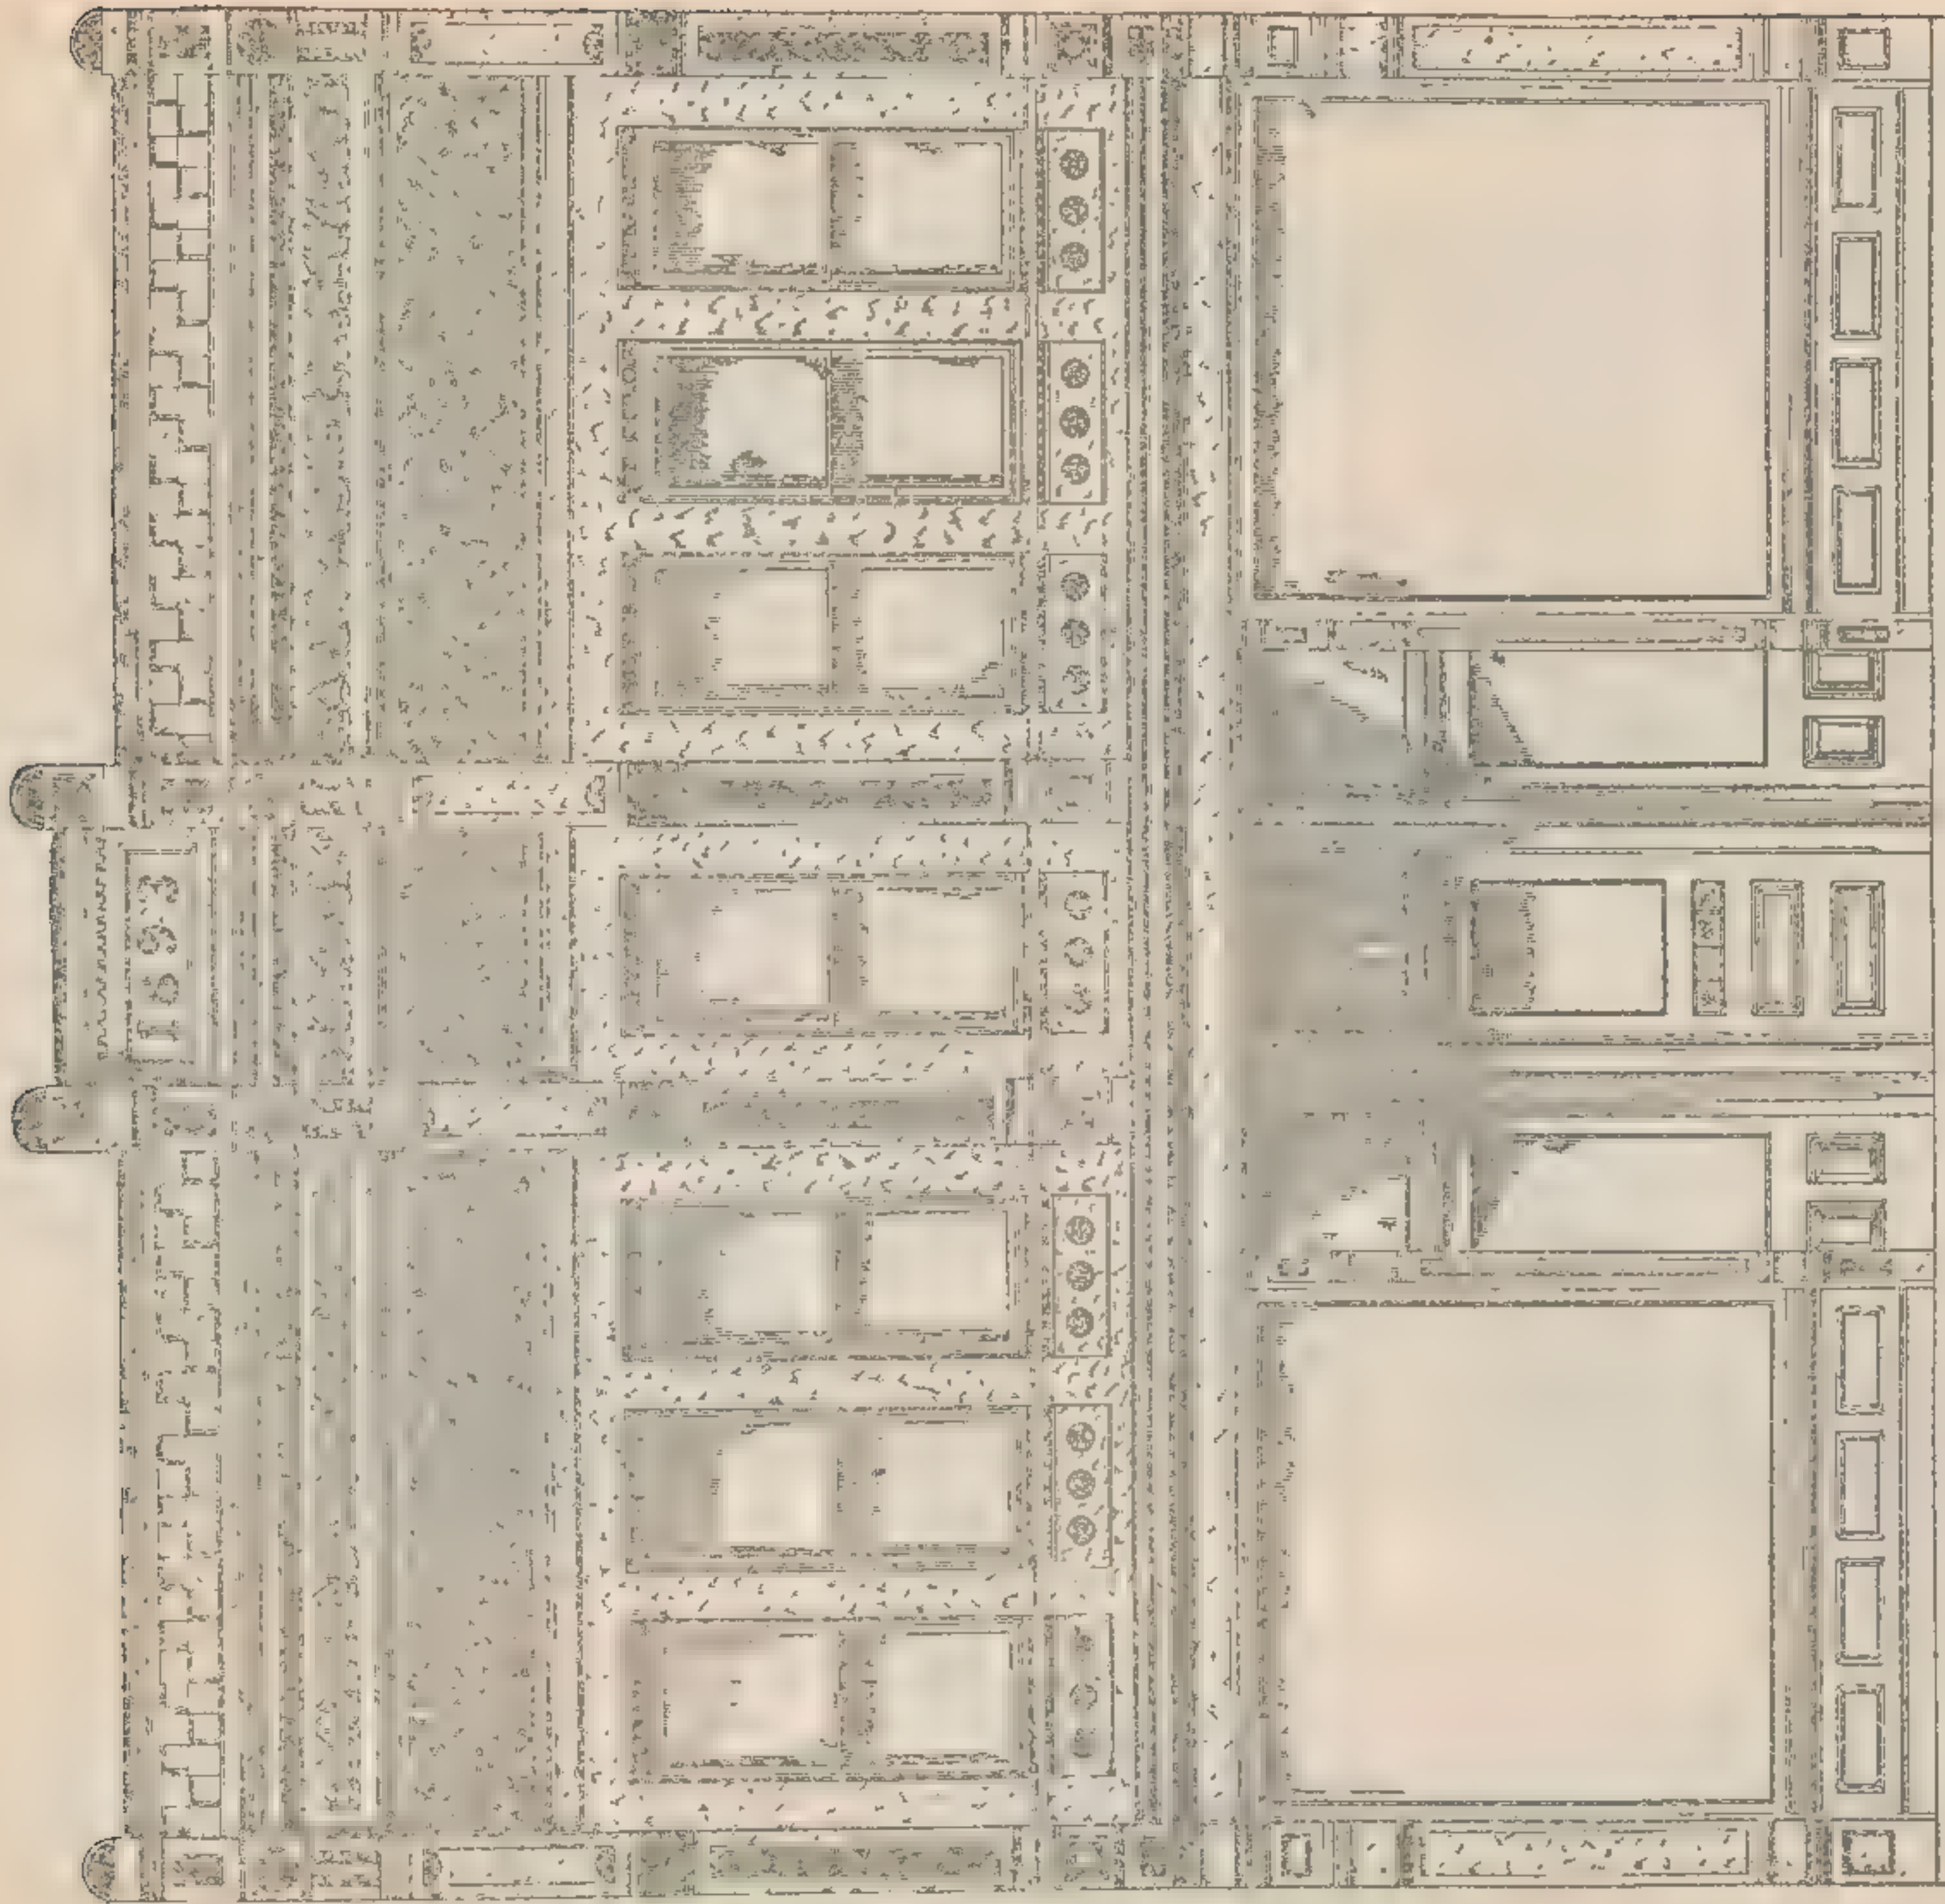

No 7113. Stamped Rock Face Front.

Price, \$375 000.

Galvanized Iron Work only.

[COPYRIGHT.]

For repairing and re-modelling old buildings nothing can equal Sheet Metal, as it is light, cheap and durable, and can be used where expense would not justify use of any other material. For repairing old brick or frame buildings it is not necessary to remove the old walls, as the Sheet Metal can be fastened to the face of same at a very trifling cost. We will be pleased to make estimates and designs for modernizing old buildings by the use of Sheet Metal Fronts.

No. 7111. Galvanized Iron Front.

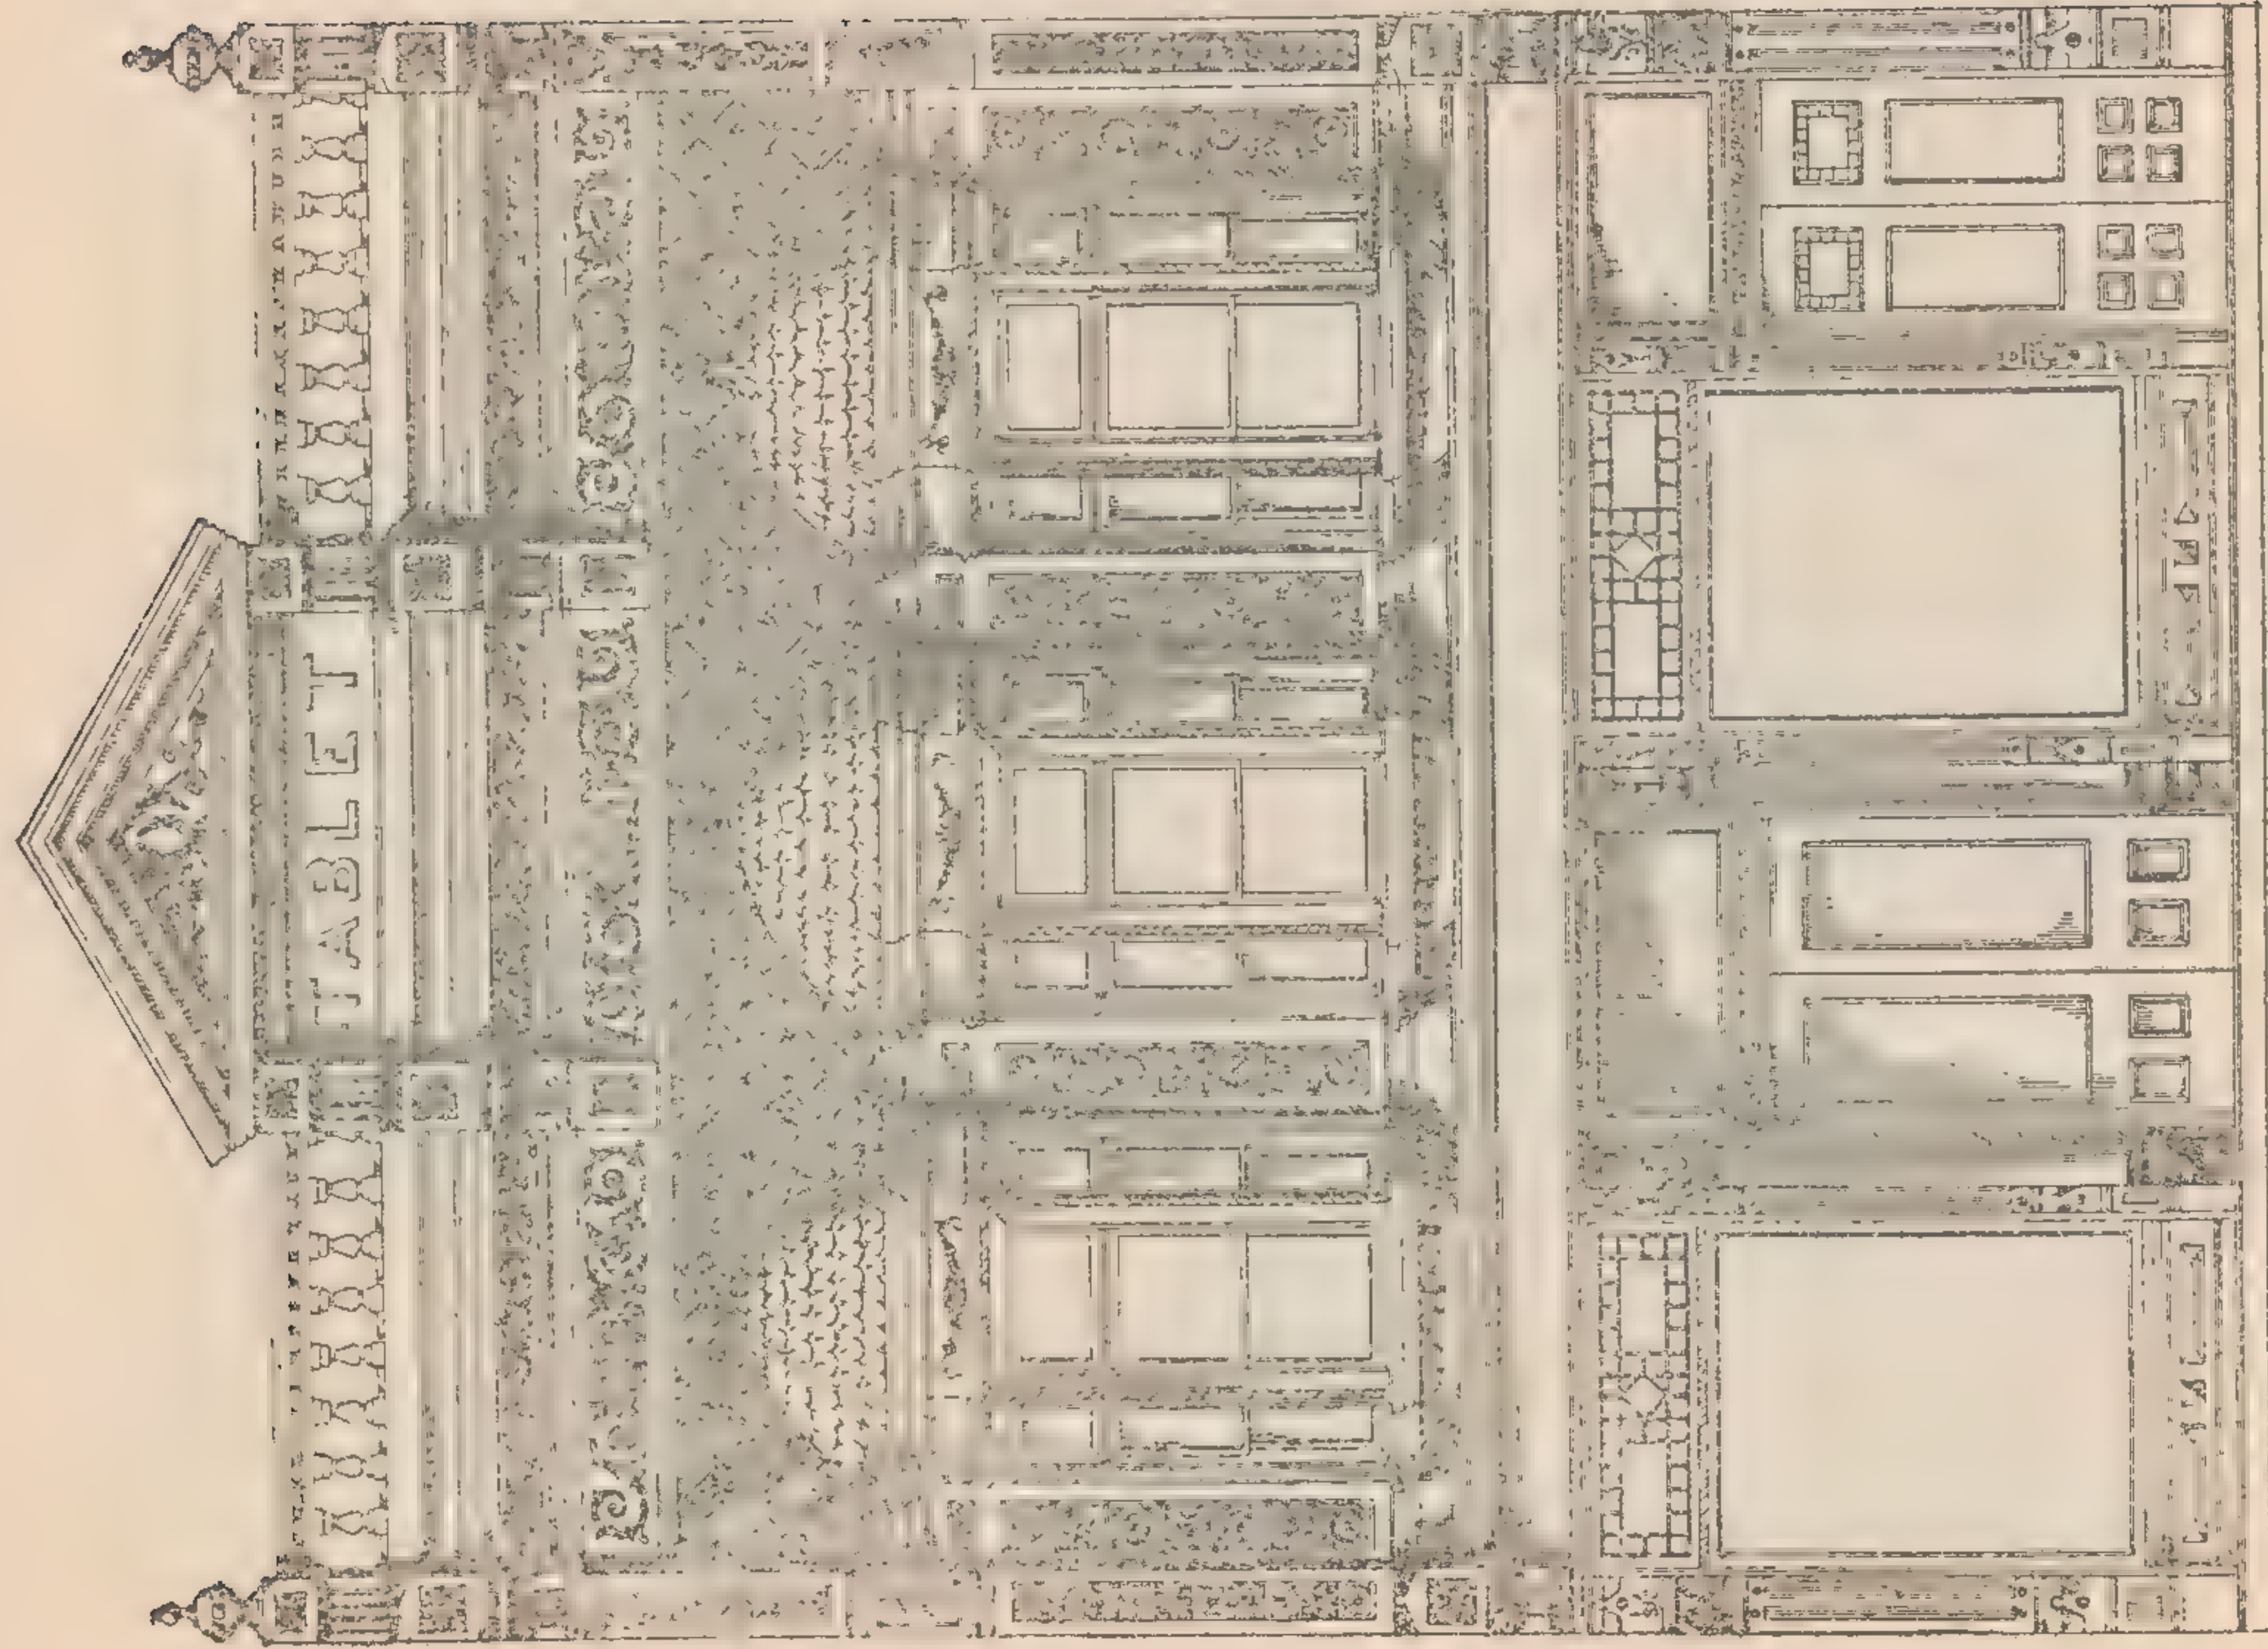

Price \$2,500.00.

Galvanized Iron Work only.

30 feet wide.

[CONTINUED]

Suitable for two storerooms below, residences or offices above.

No. 365. Sheet Metal Front.

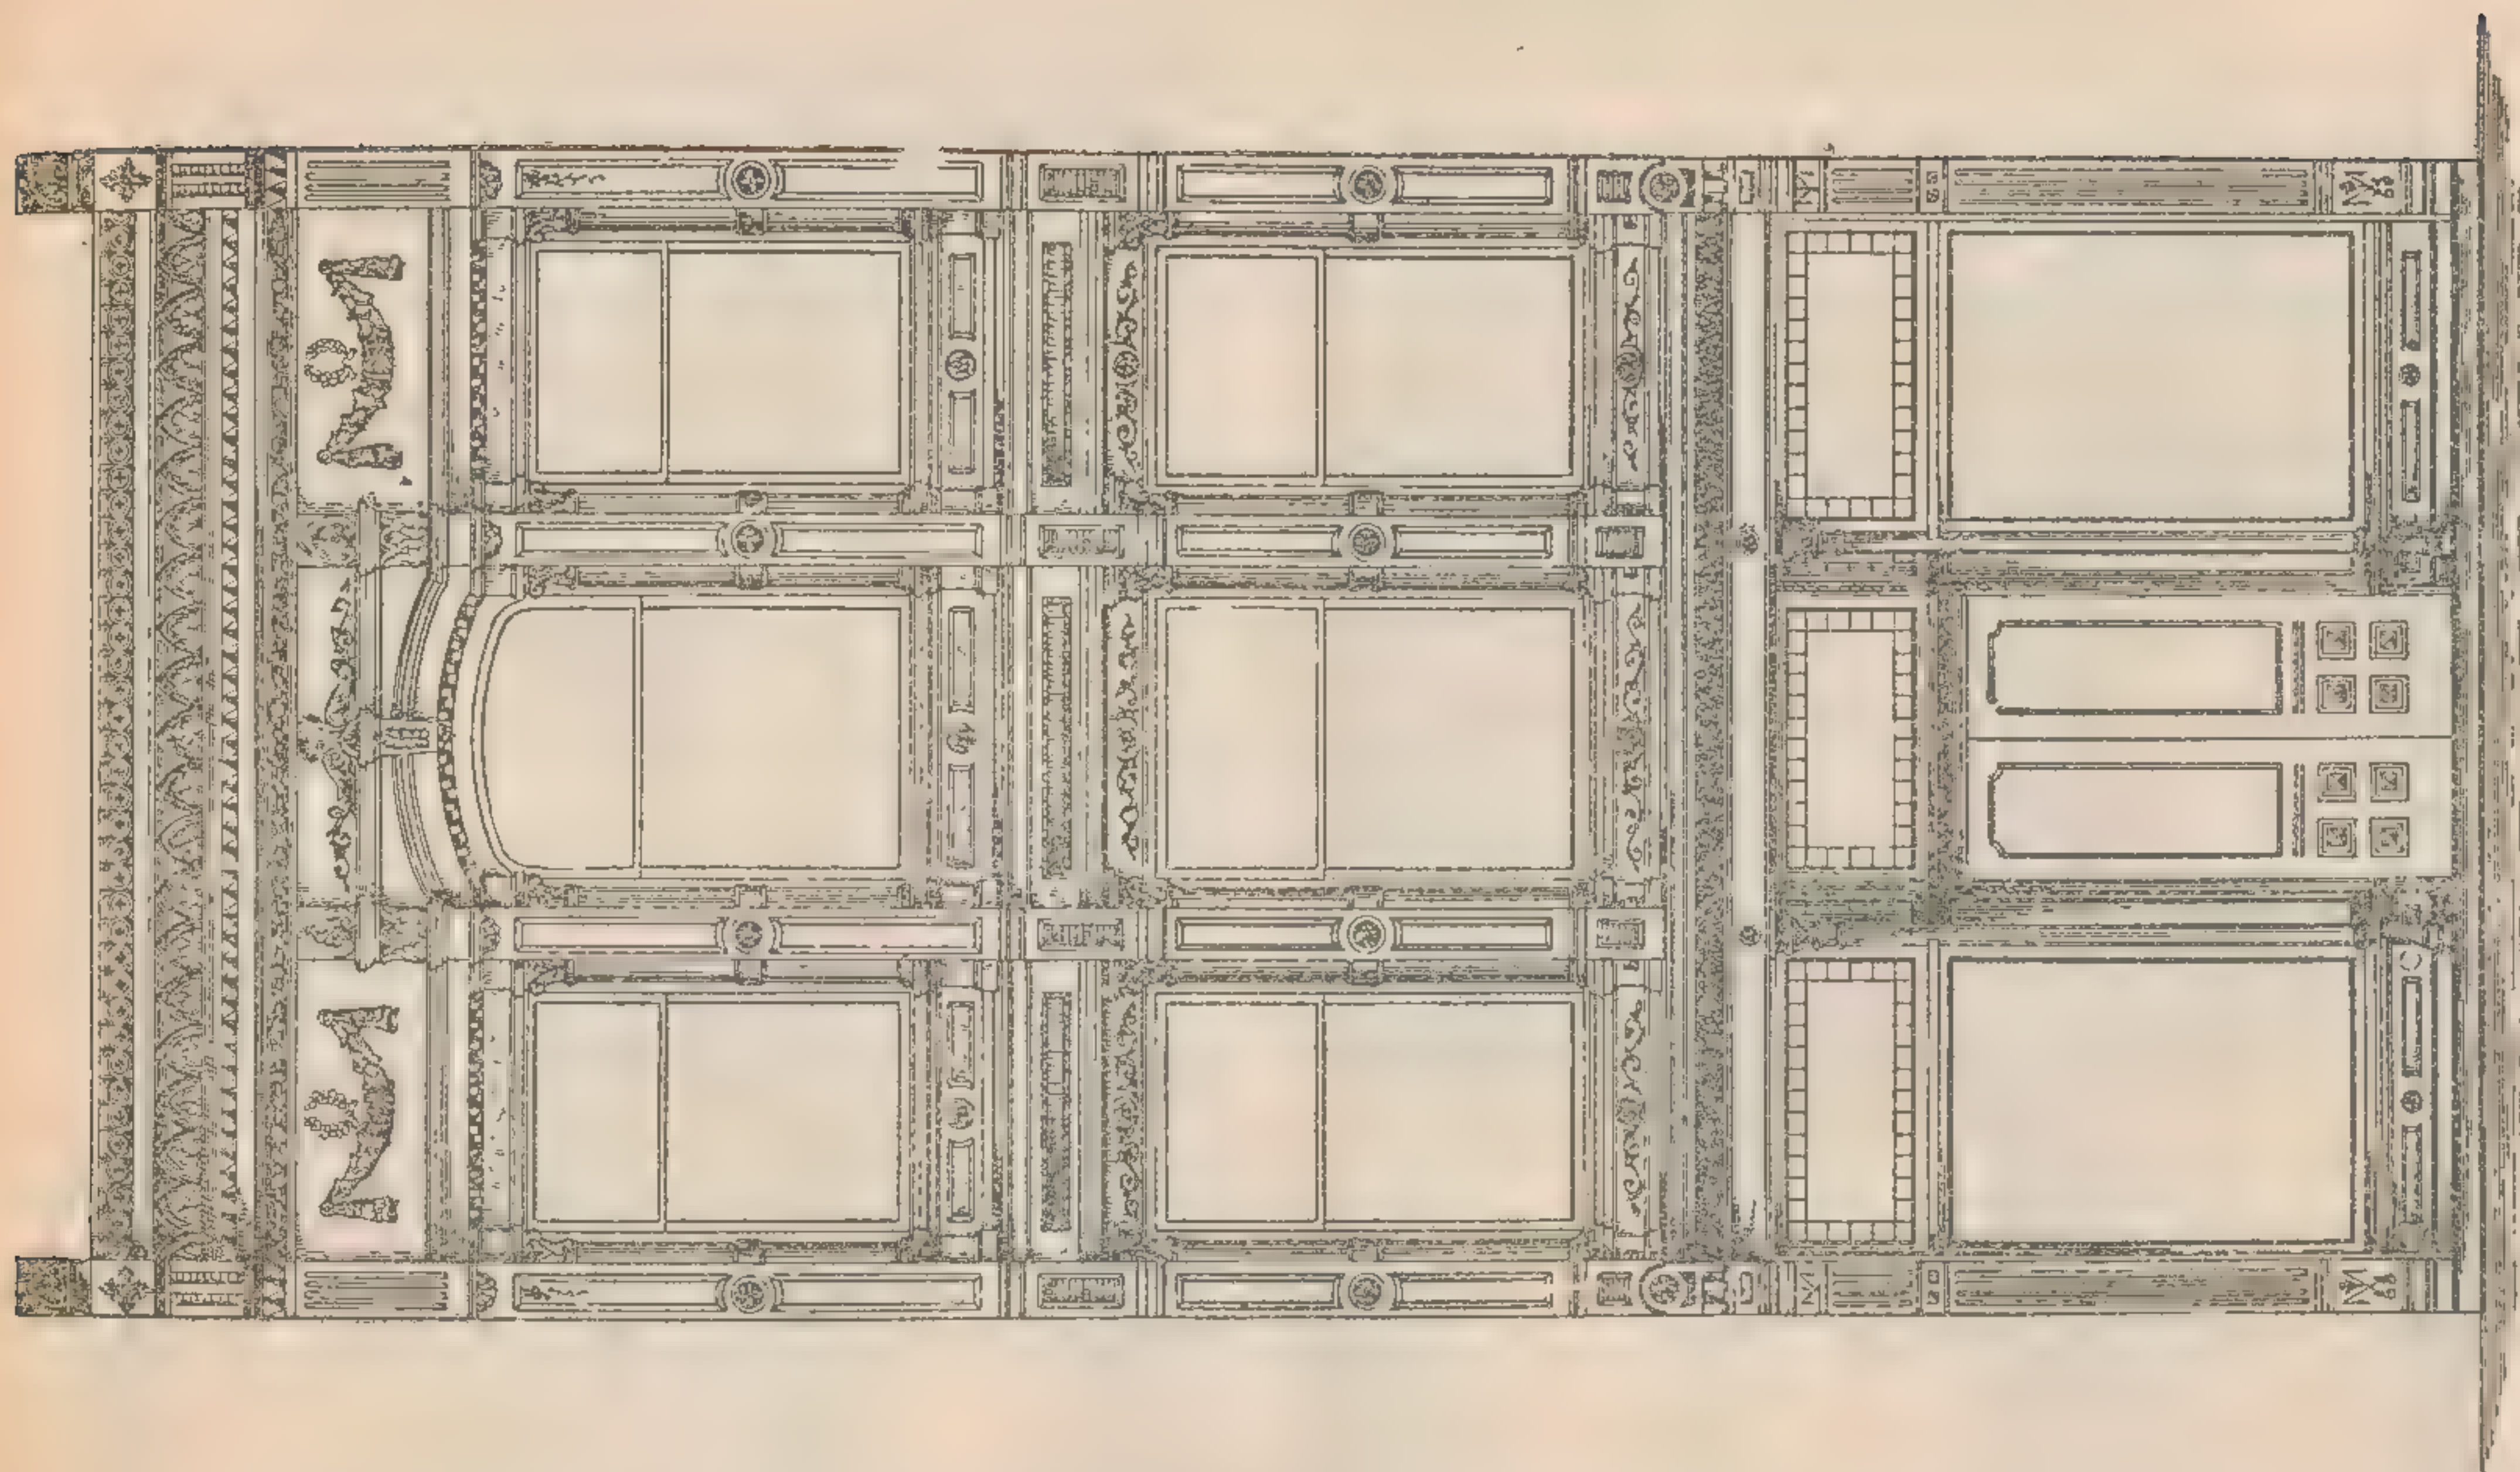

Price, \$585 00.

Galvanized Iron Work only.

30 feet wide.

This design is intended for Store Room on lower and Office or Residence on second floor. The projecting bay windows throw a great amount of light into the upper story, making it particularly desirable for use mentioned.

Sizes given for designs are not arbitrary; they can be varied to suit your wants. Write, stating size of front you wish, and I will quote you price.

No. 361. Sheet Metal Front.

Price, \$450.00.

Galvanized Iron Work only.

22 feet wide.

Sheet Metal Fronts are particularly valuable for repairing or modernizing old brick or stone buildings, as the Galvanized Iron Work can be put up on face of old building, making an entirely new exterior but leaving old walls intact. Send me photograph or drawing of your old building, with figured measurements, and I will send you special designs, with price, for a new Sheet Metal Front. Prices include only Galvanized Iron Work and do not include first story sills or columns.

Galvanized Iron Work only

20 feet wide.

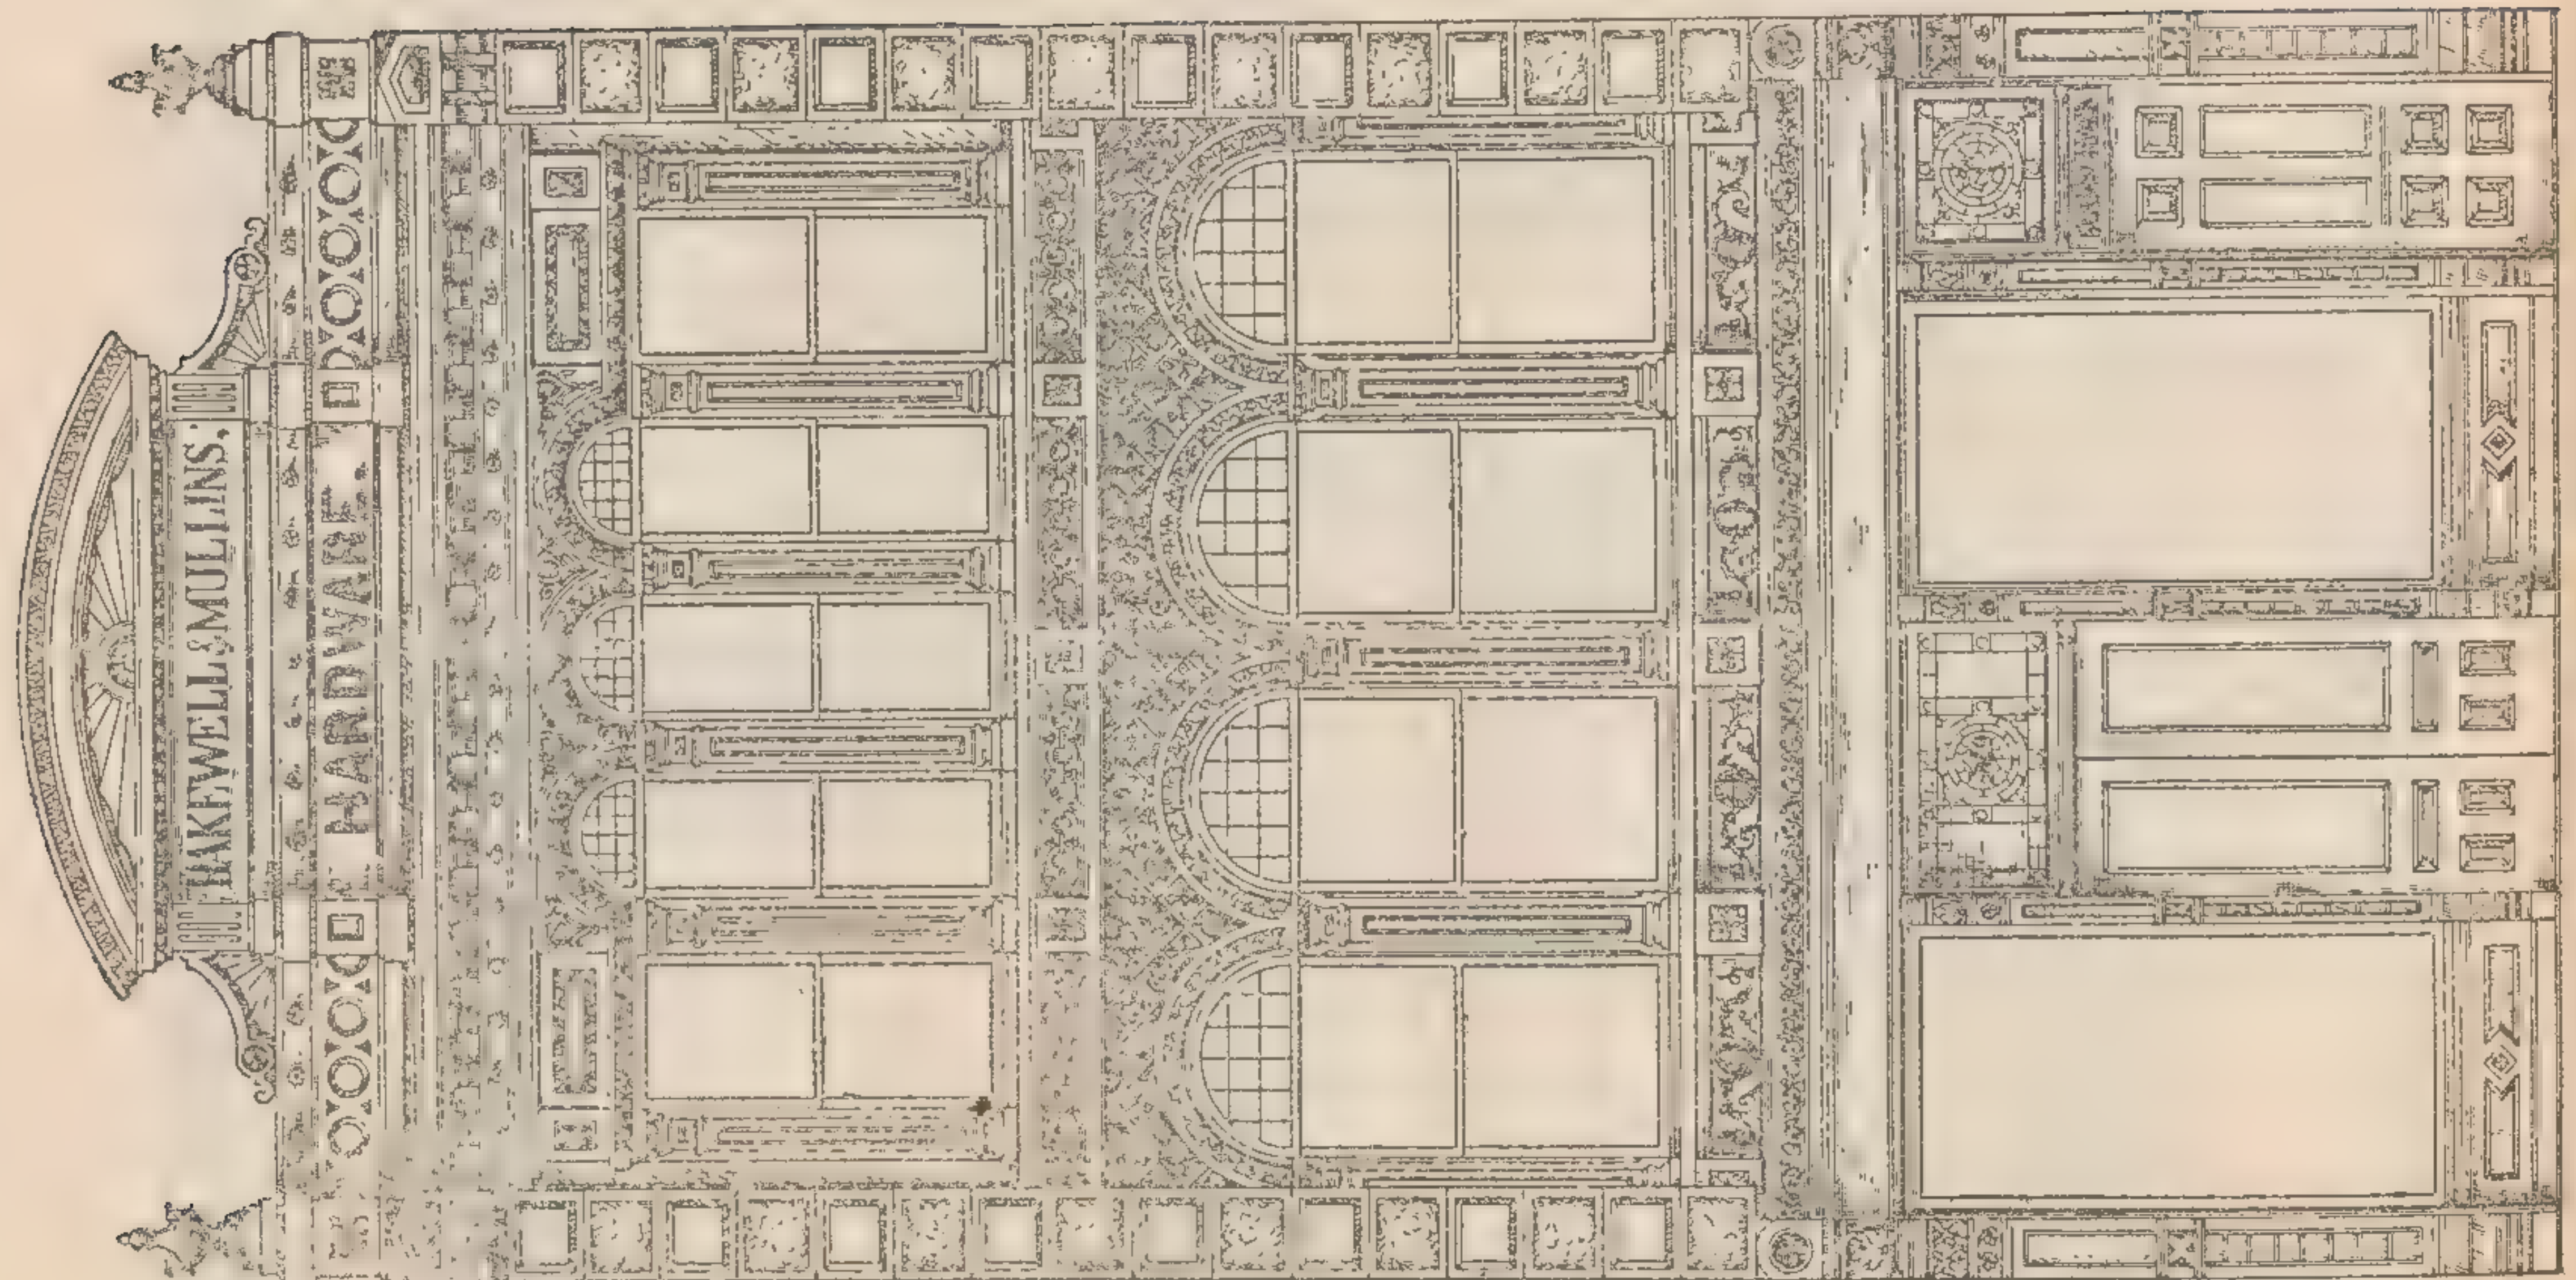

No. 7109 Sheet Metal Front.
Galvanized Iron Work only.

Price, \$210.00.

25 feet wide.

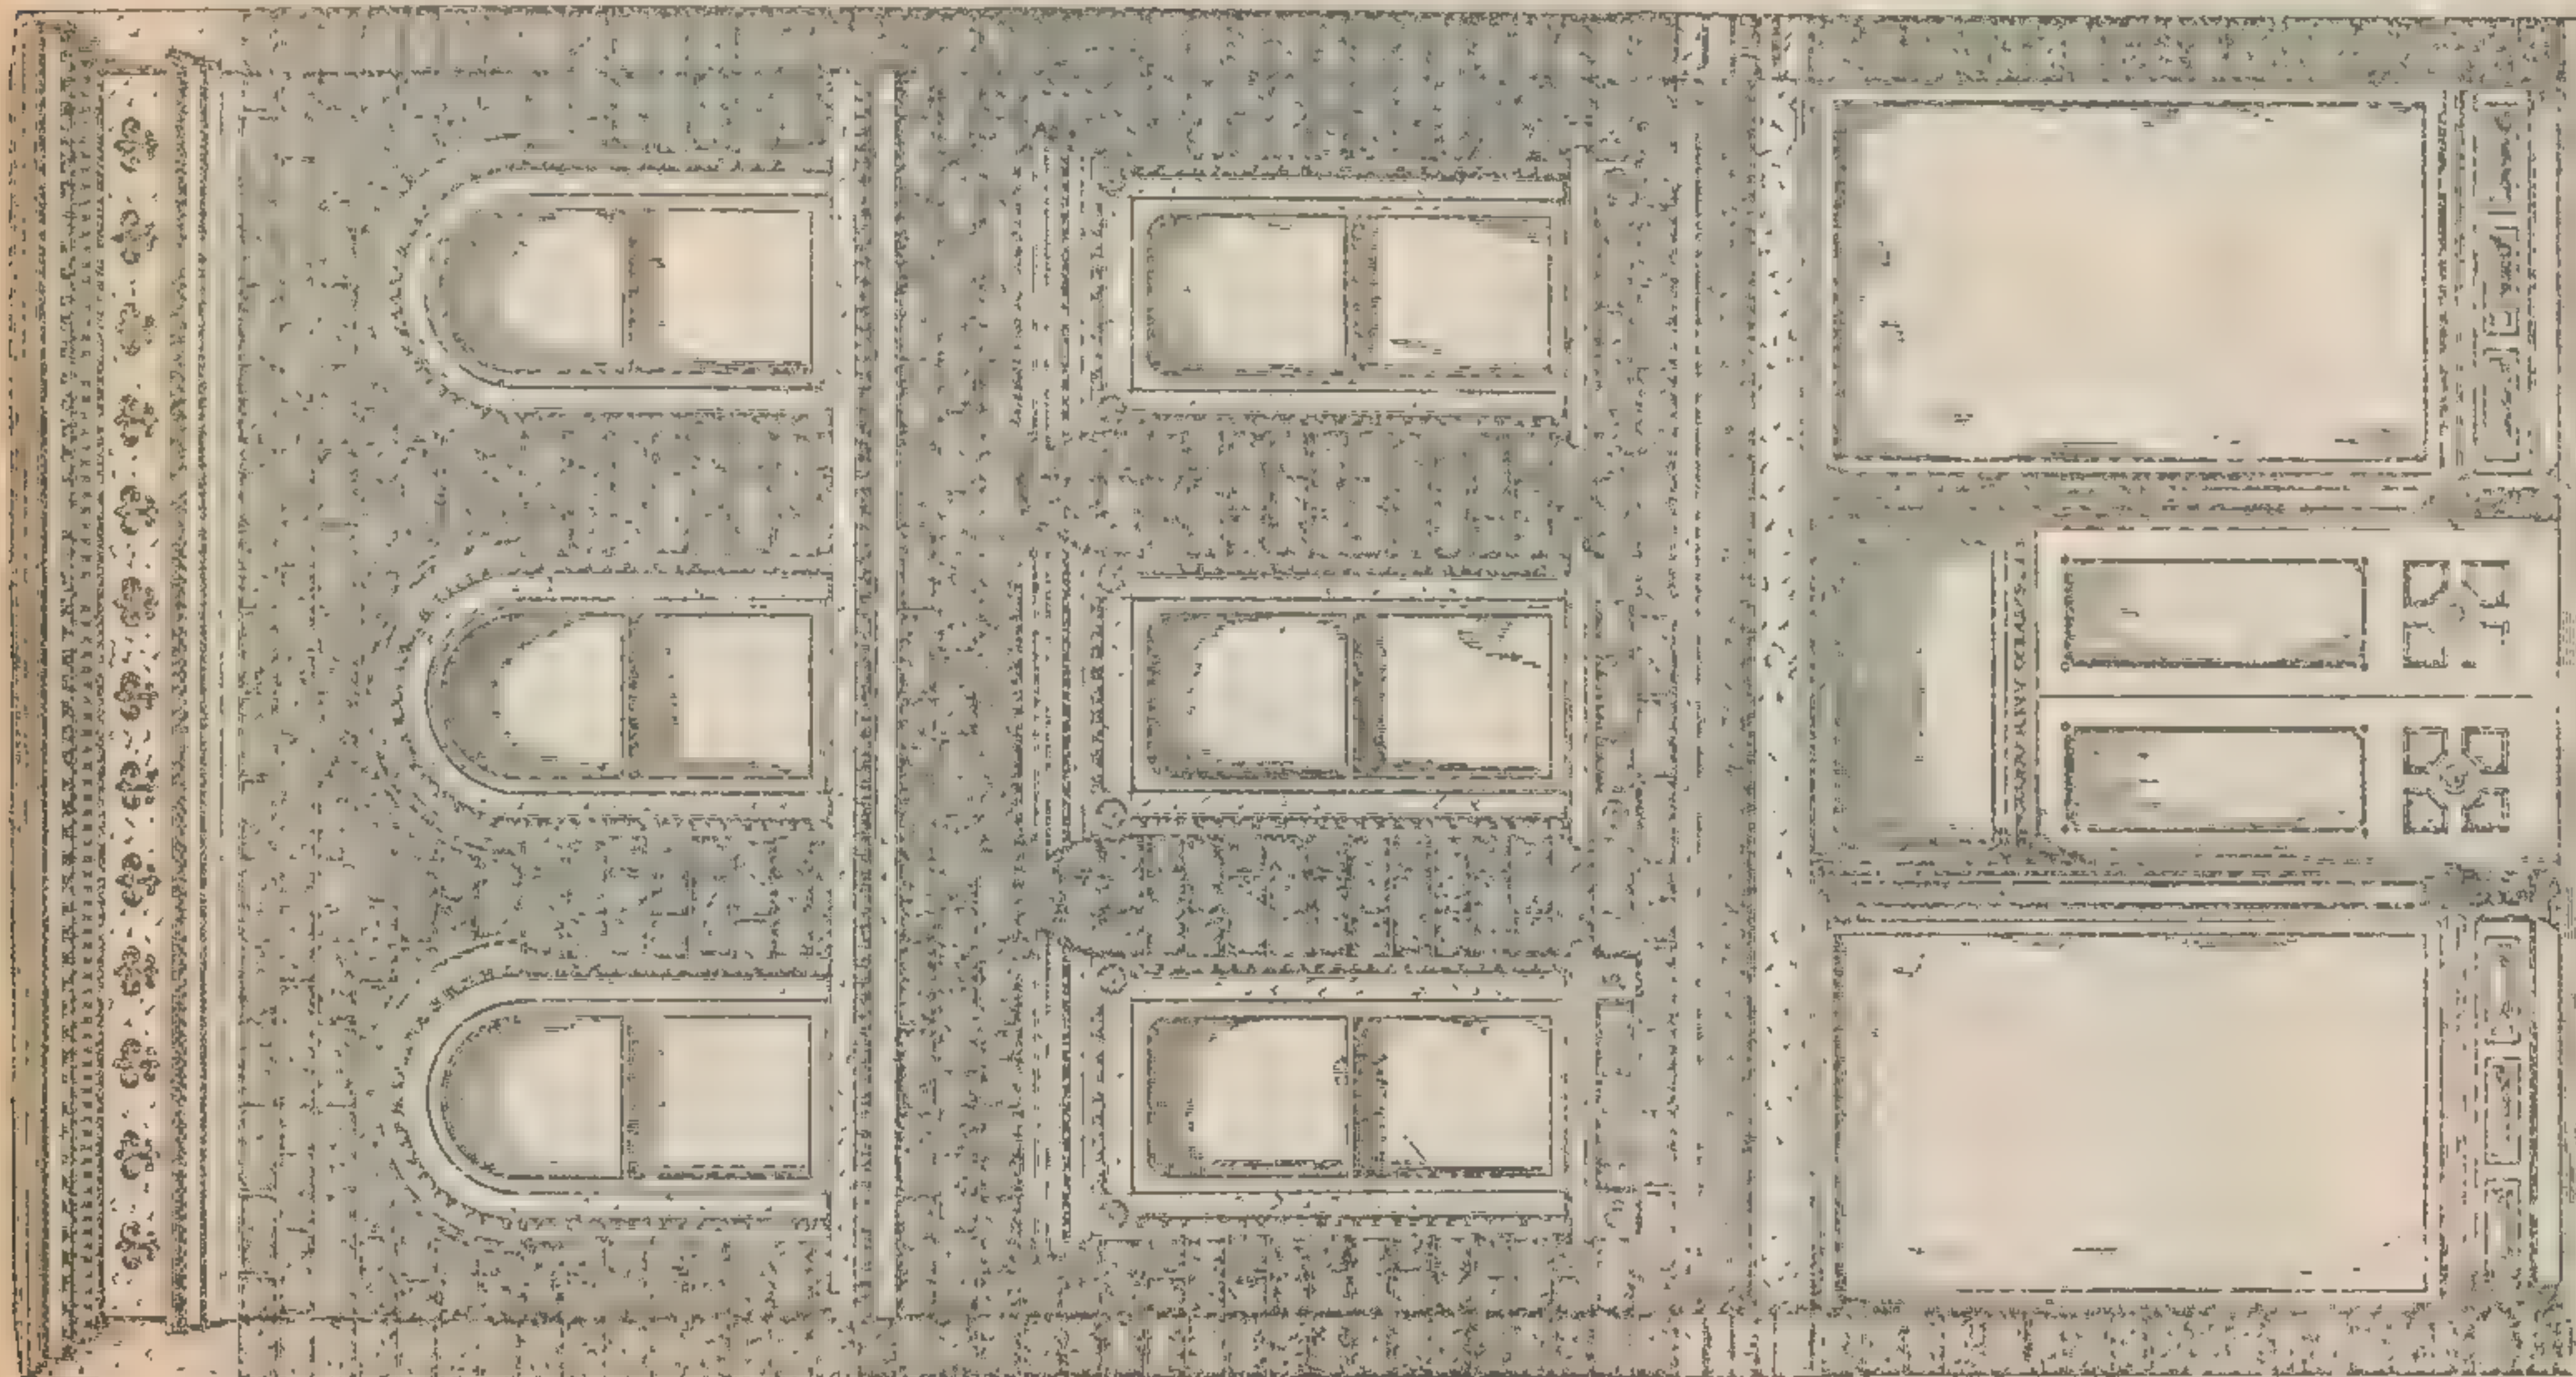

In ordering Sheet Metal Fronts be particular to send plan and elevation of building, giving in figured measurements every detail possible, such as thickness of walls, width and height of windows and door openings and total width of building together with thickness of floor joists and floor, height of stories and total height of building. We do not furnish wood work, glass, hardware, sills or columns at price quoted. Prices for any of these on application.

[COPYRIGHT.]

NOTICE— Sizes of Fronts can be changed to suit requirements. Send me your drawings showing size of proposed building, and I will quote you prices. All Fronts made of best quality of Galvanized Iron, with bold, heavy Zinc Ornaments, and all securely soldered and riveted in best and most secure manner known to the trade. Any of these designs can be furnished in copper if desired. Write for prices before ordering copper work.

If you contemplate building write to us for designs and prices. If catalogue does not contain what you want it is more than probable that among our many thousands of designs and dies that we will have what you are looking for. Write and see.

No. 7112 Standard Rock Face Front.

Galvanized Iron Cornice.

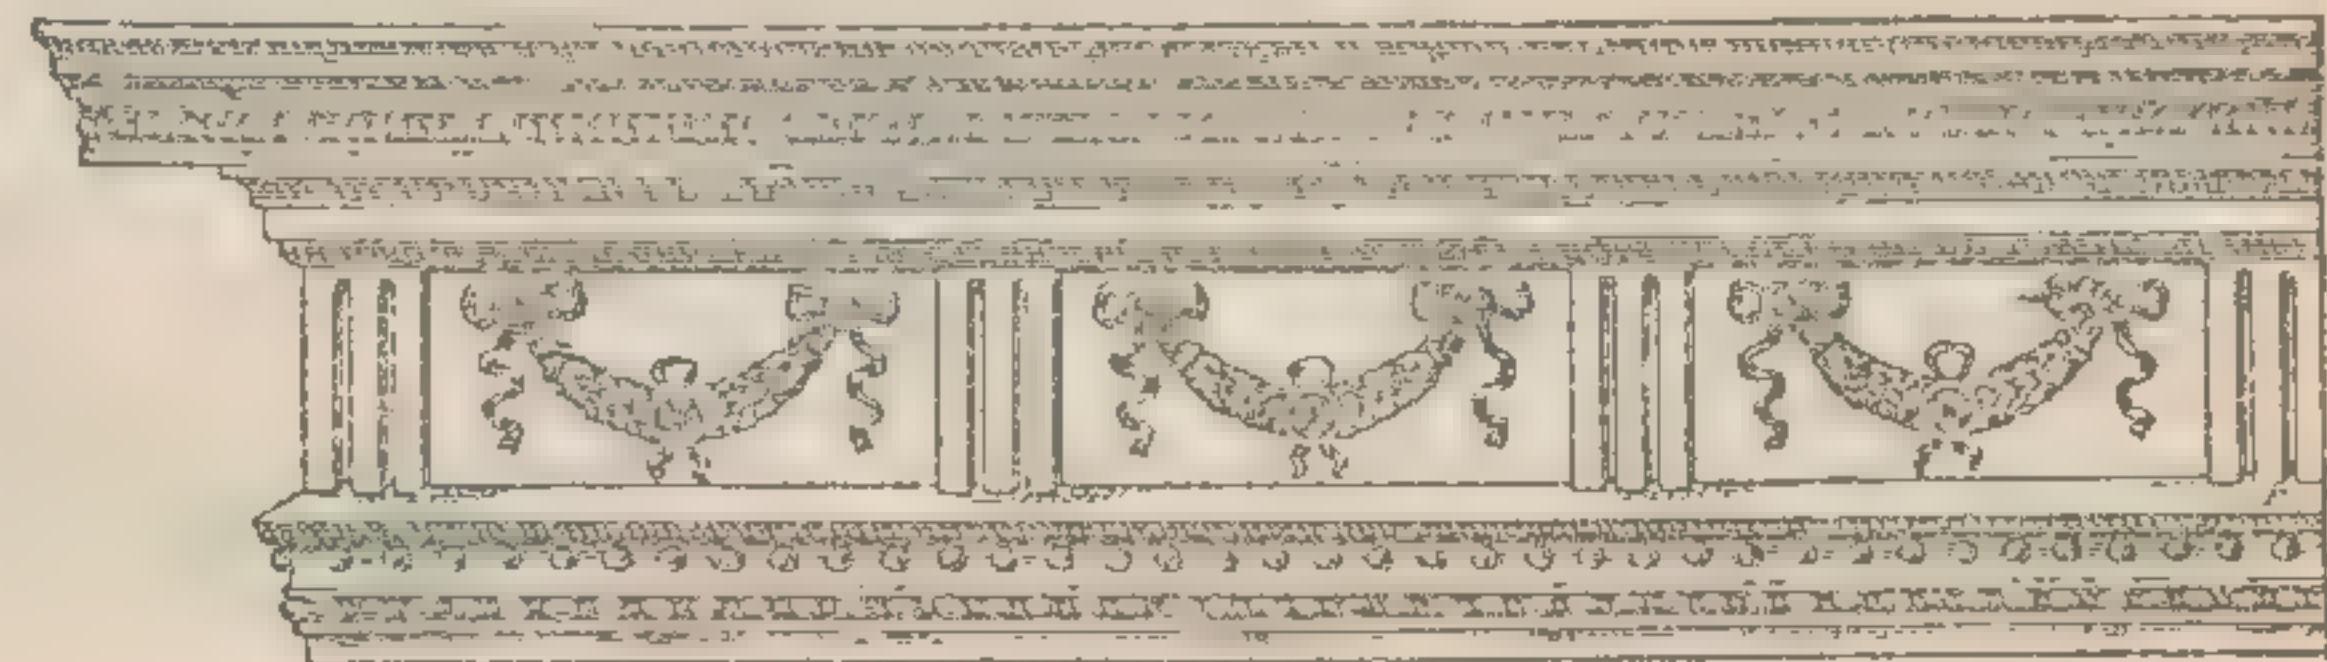

Price, \$250.00

No. 369 Sheet Metal Front
Galvanized Iron Work only

20 feet wide

Cornice No. 877. Height 36 inches, projection 10 1/4 inches. Per foot, \$3.00. Mitres \$1.50 each.

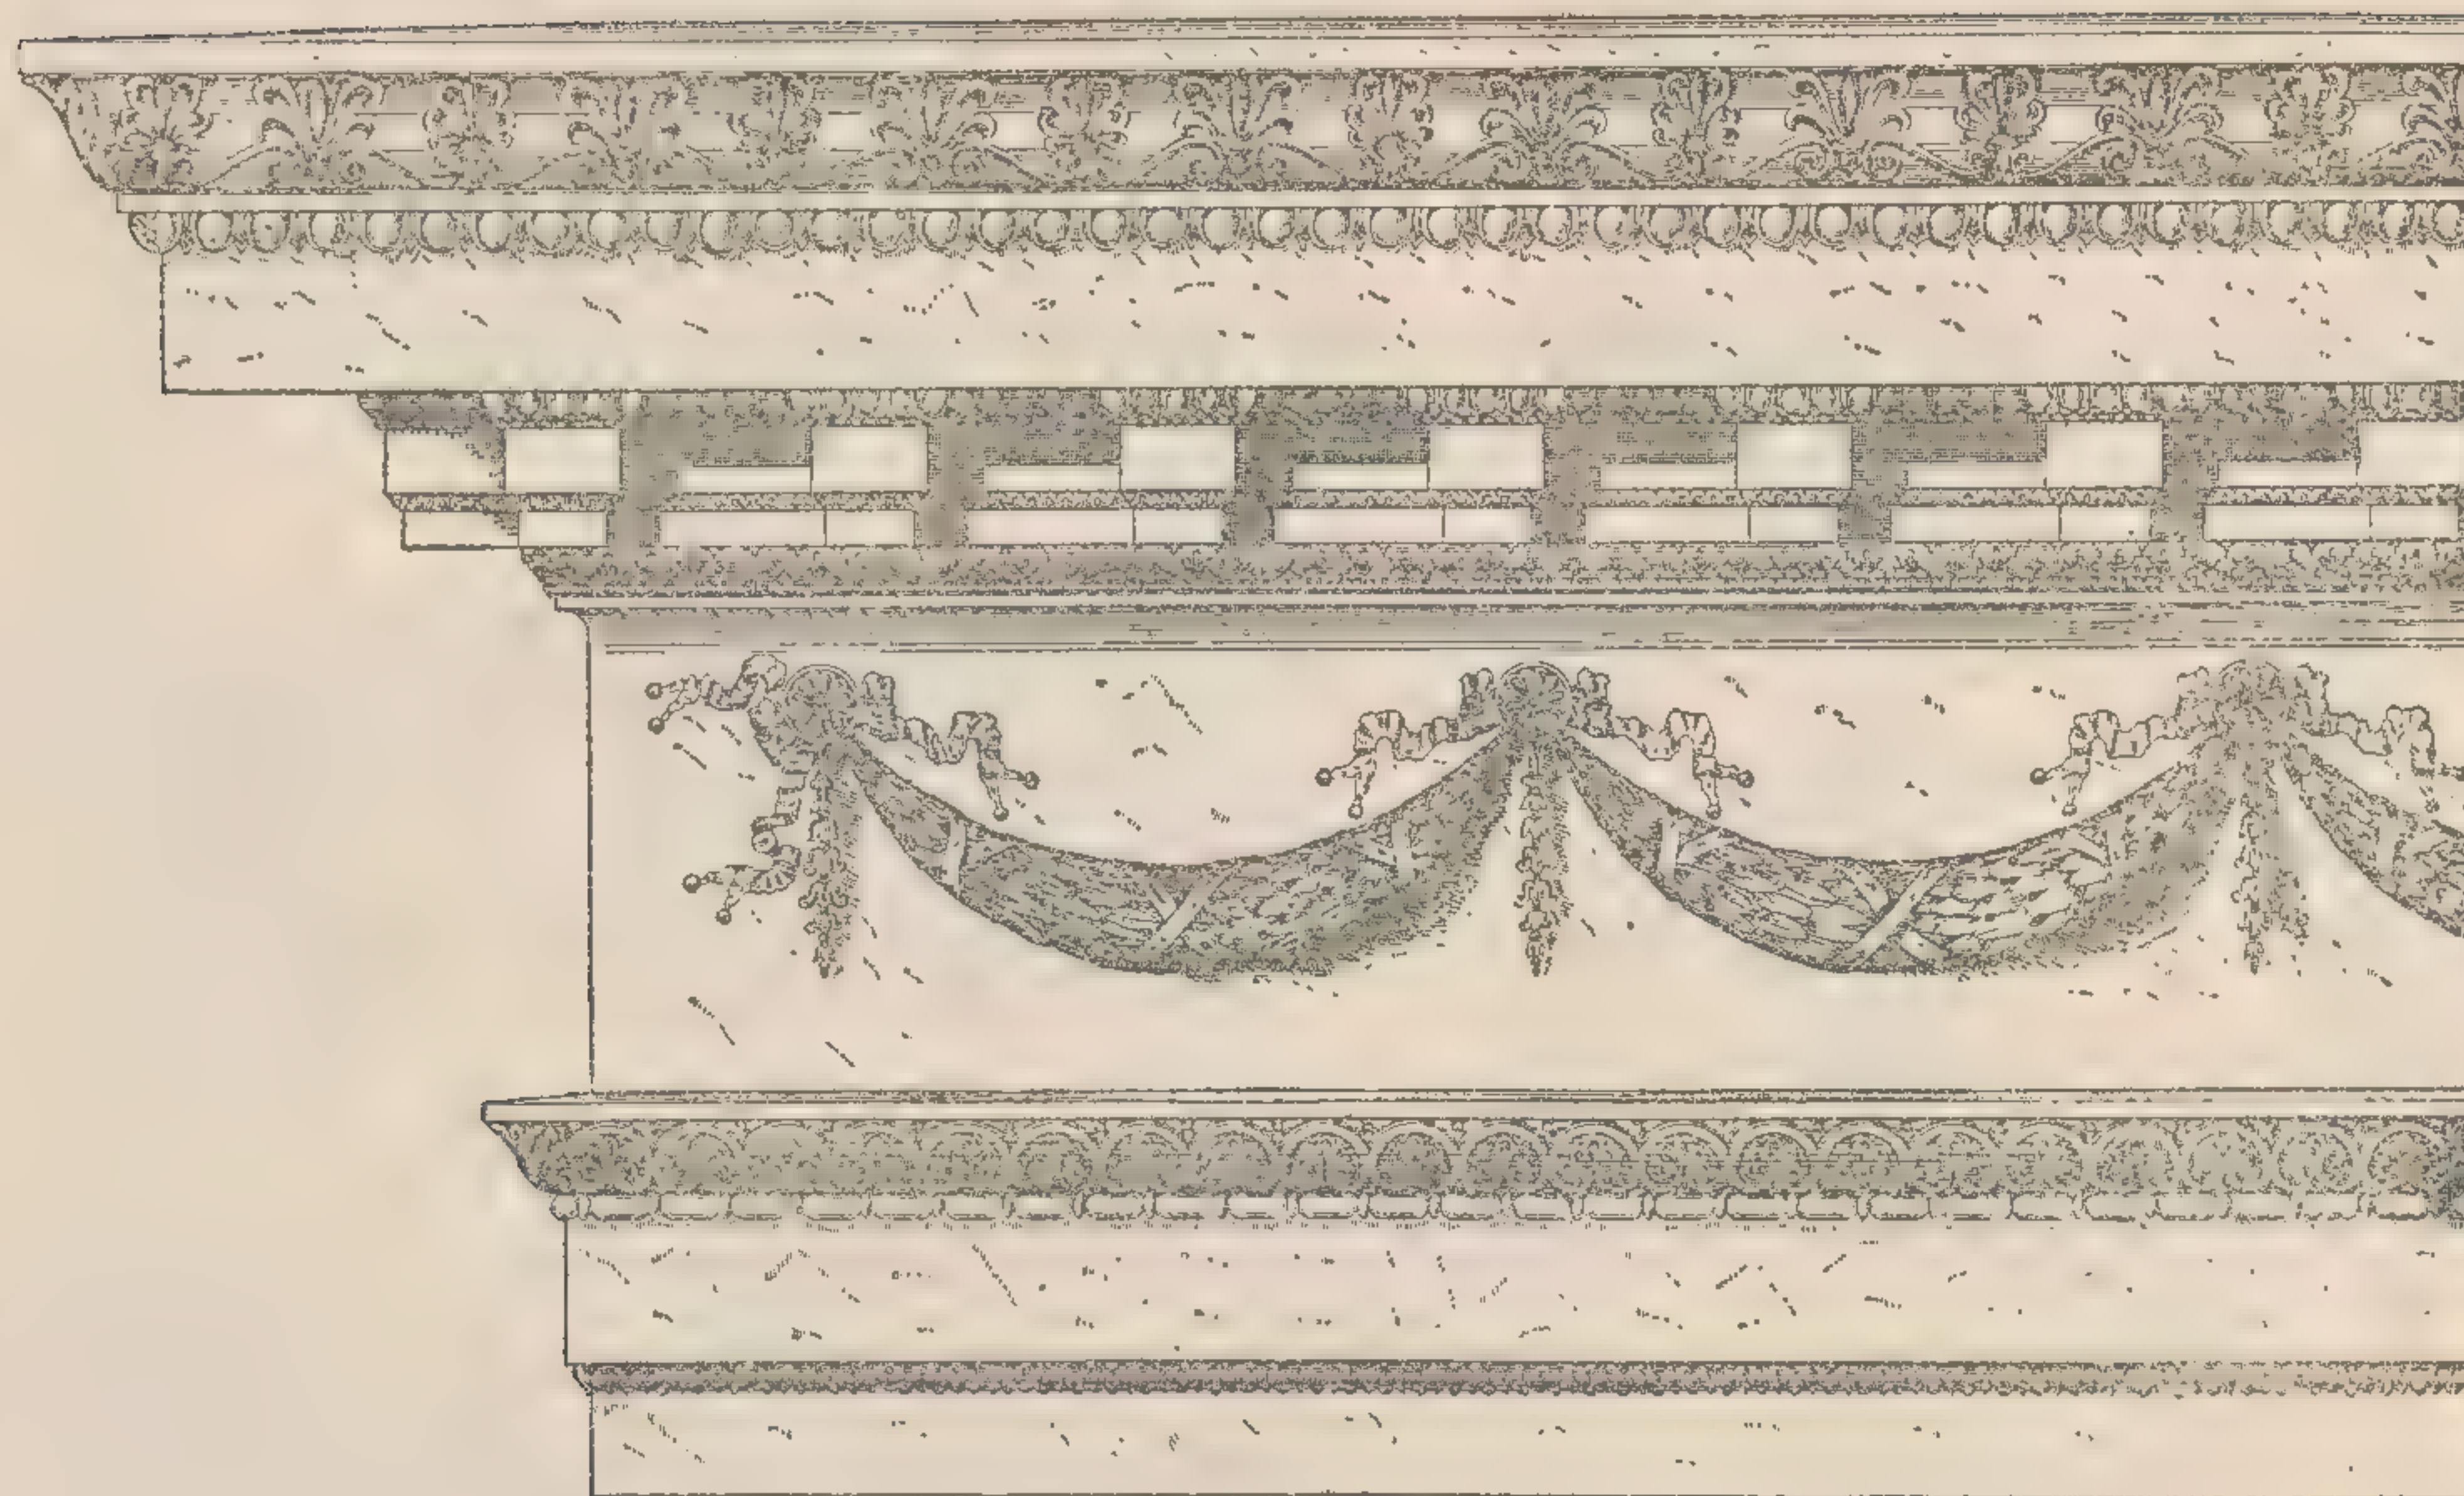

Cornice No. 280. Height 44 inches, projection 20 inches. Per foot, \$3.00. Mitres, \$1.75 each.

Cornice No. 381. Height 32 inches, projection 15 inches. Per foot, \$3.00. Mitres, \$1.50 each.

Cornice.

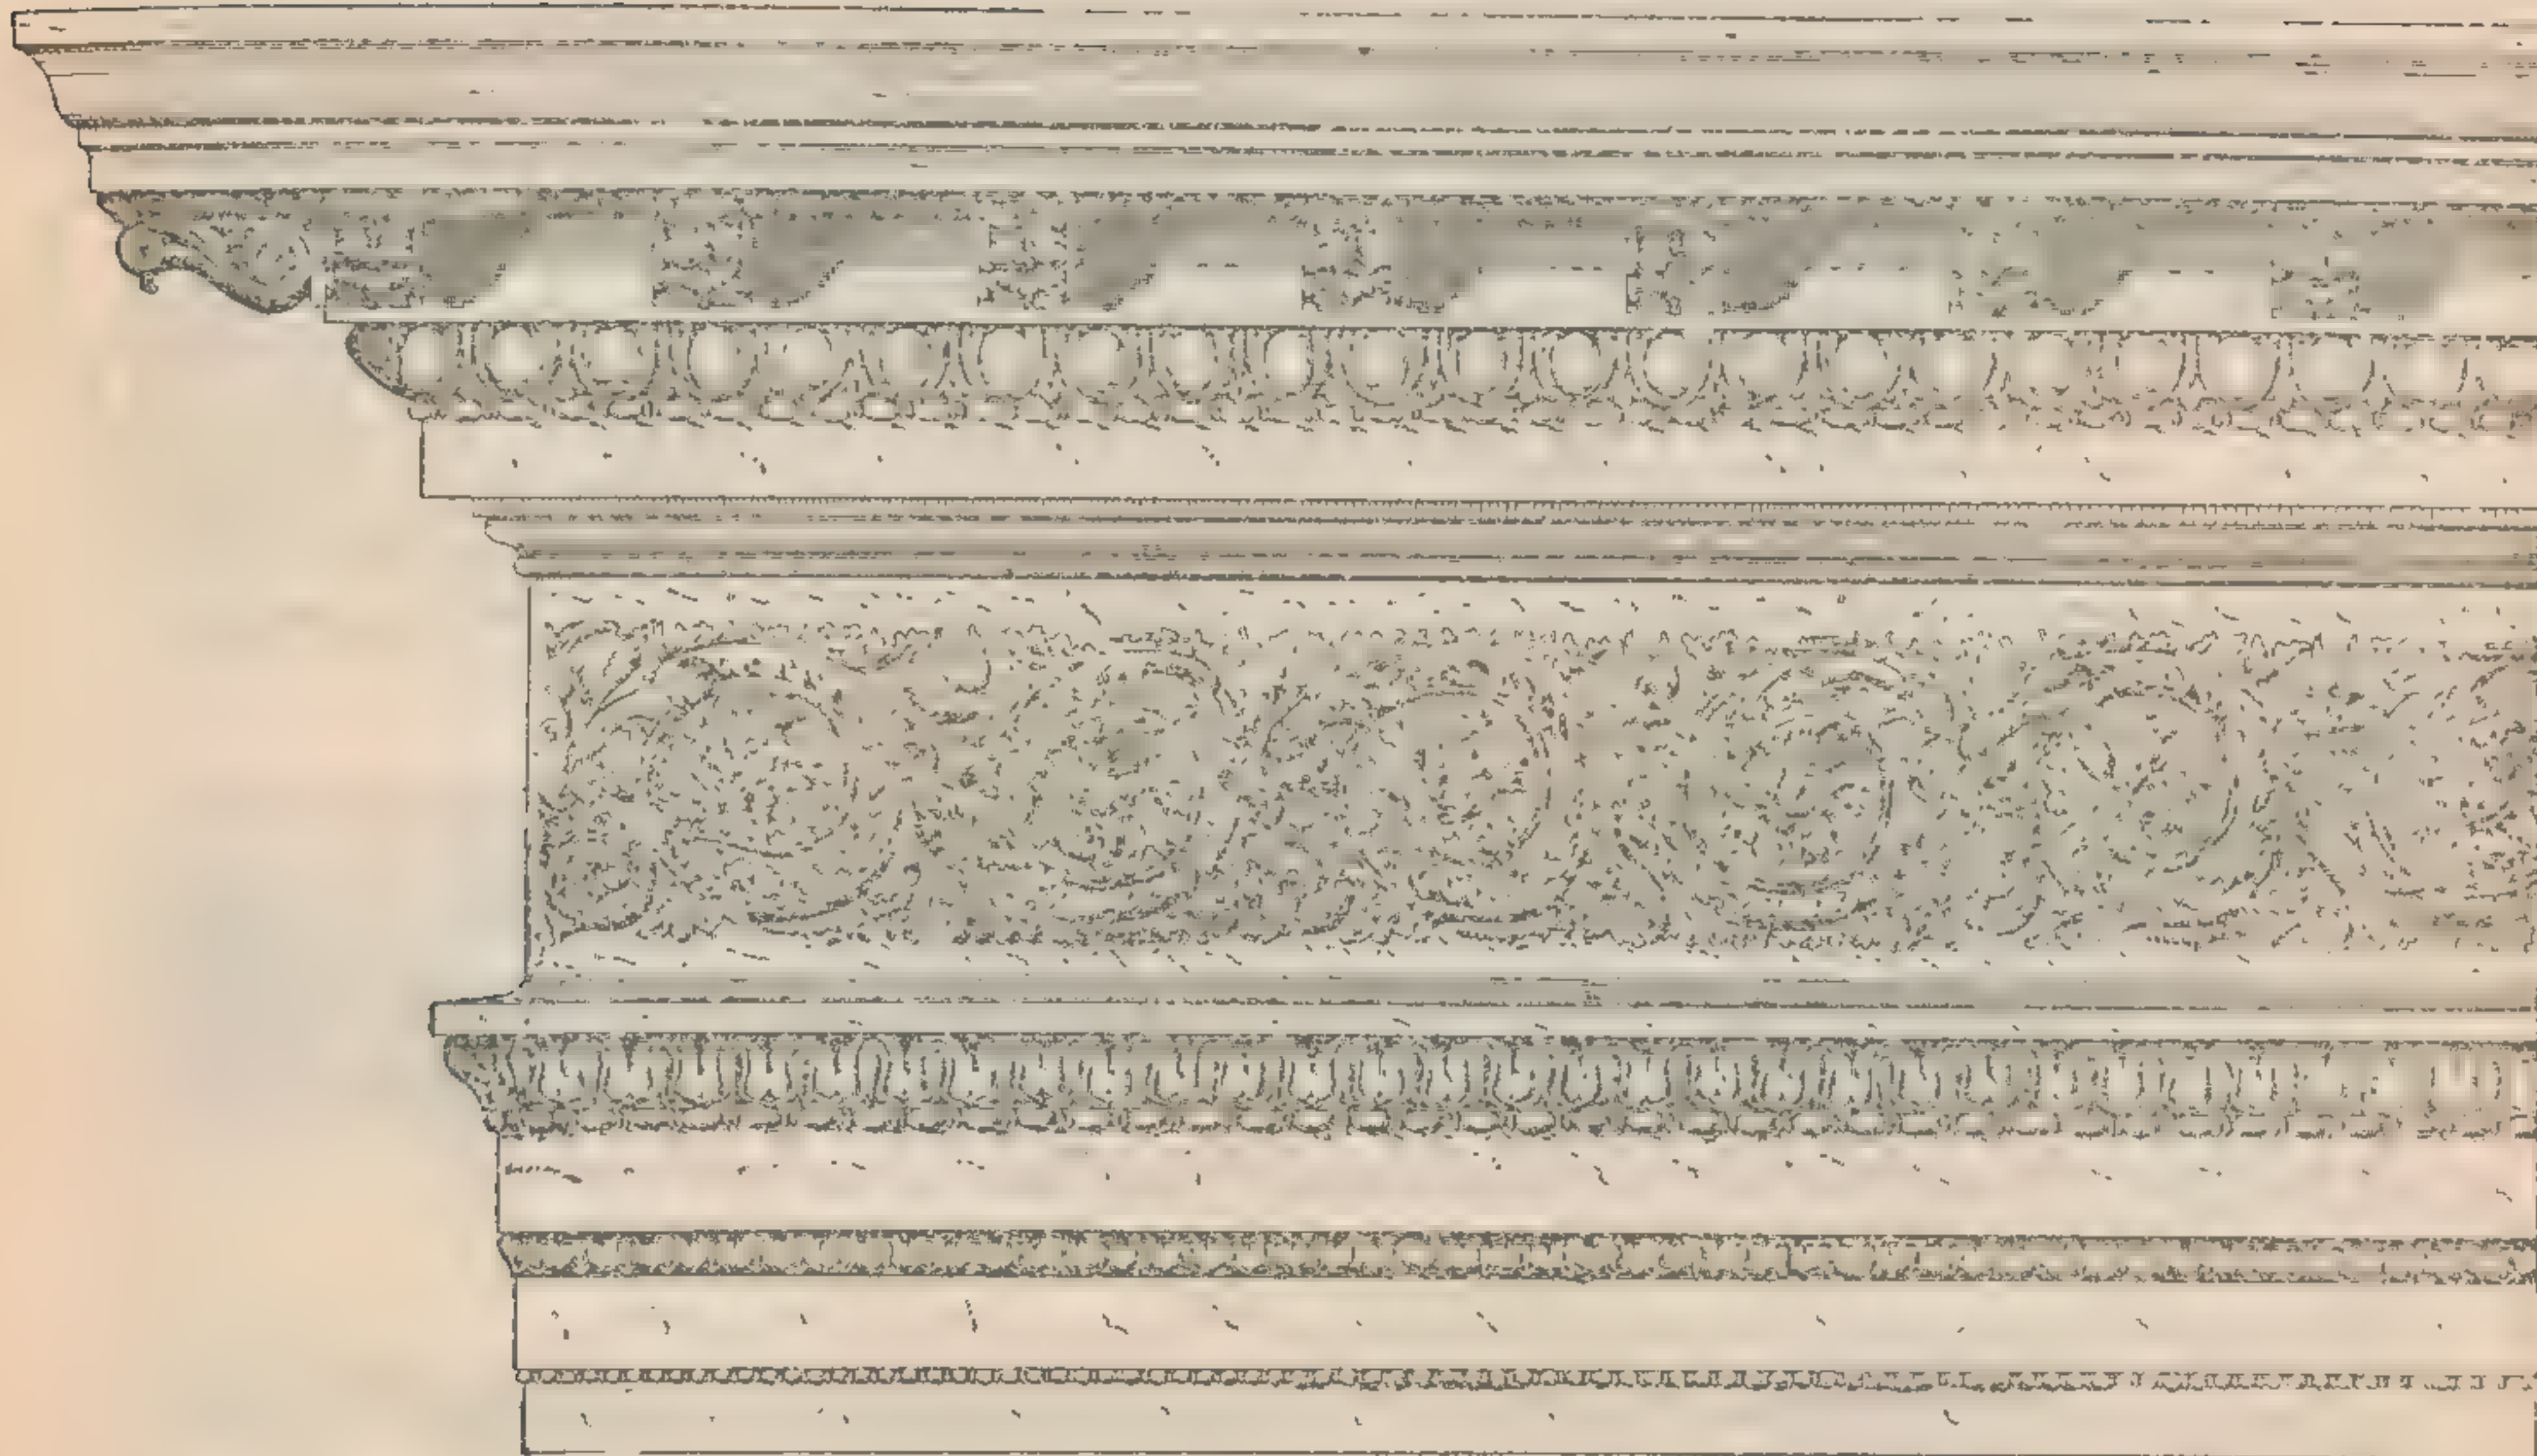

Cornice No. 7012. Height 73 inches, projection 29 inches

Price, \$7.00 per foot, complete, in sections, including wrought iron braces. Mitres, \$4.50 each.

All the designs of Cornice shown on pages 14 to 24 inclusive show to best advantage if made in copper. Send us your drawings and get prices on your own or your architect's designs. Any design of Cornice shown in catalogue made in copper priced on application. In ordering give full shipping directions and state whether to ship by *Express or Freight*. Parties unknown to us will save time and annoyance by sending reference as to financial standing at time of sending order.

Cornice.

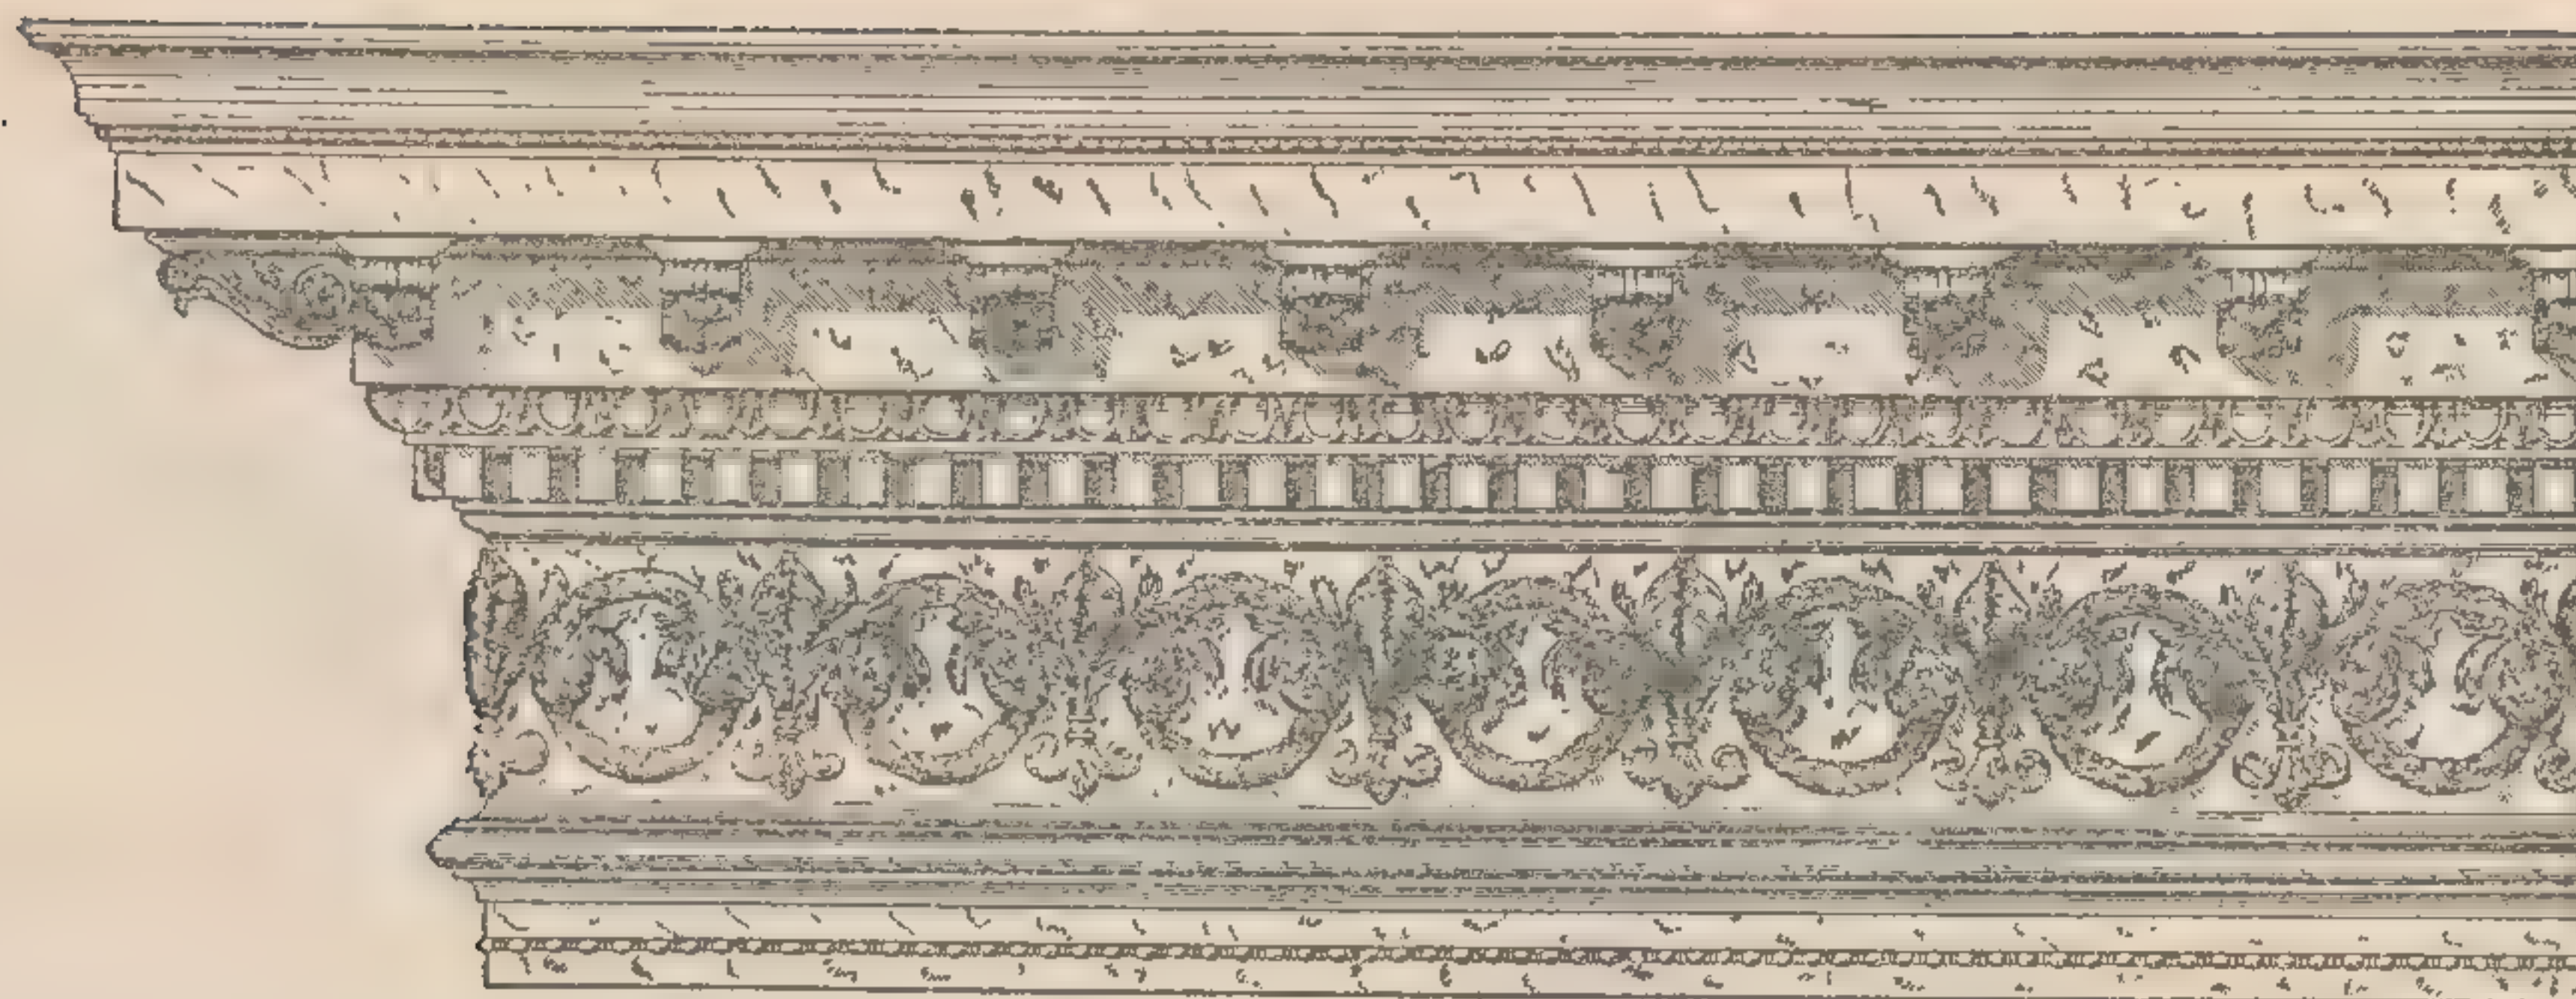

Cornice No. 7008. Height 88 inches, projection 26 inches.

Price \$8.00 per foot, complete, in sections, including wrought iron lookouts. Mitres, \$3.00 each

The above design should be made in copper to obtain the best results. The rich dark bronze color of the copper after a short exposure to the weather shows off the stored ornamental work to the best advantage. Prices for copper cornice quoted on application.

W H MULLINS, SALEM, OHIO, U S A
Cornice

Cornice No. 7004 Height 45 inches, projection 23 inches.
Price \$5.00 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$2.75 each

Cornice No. 7006 Height 45 inches, projection 18 inches.
Price \$2.75 per foot, complete, in sections, including wrought iron lookouts. Mitres, \$2.50 each.

All prices for Cornice work in catalogue are based on using best quality of Crimped Galvanized Iron, with heavy bold stamped Zinc Ornaments. Price for same designs made in cold rolled copper will be quoted on application.

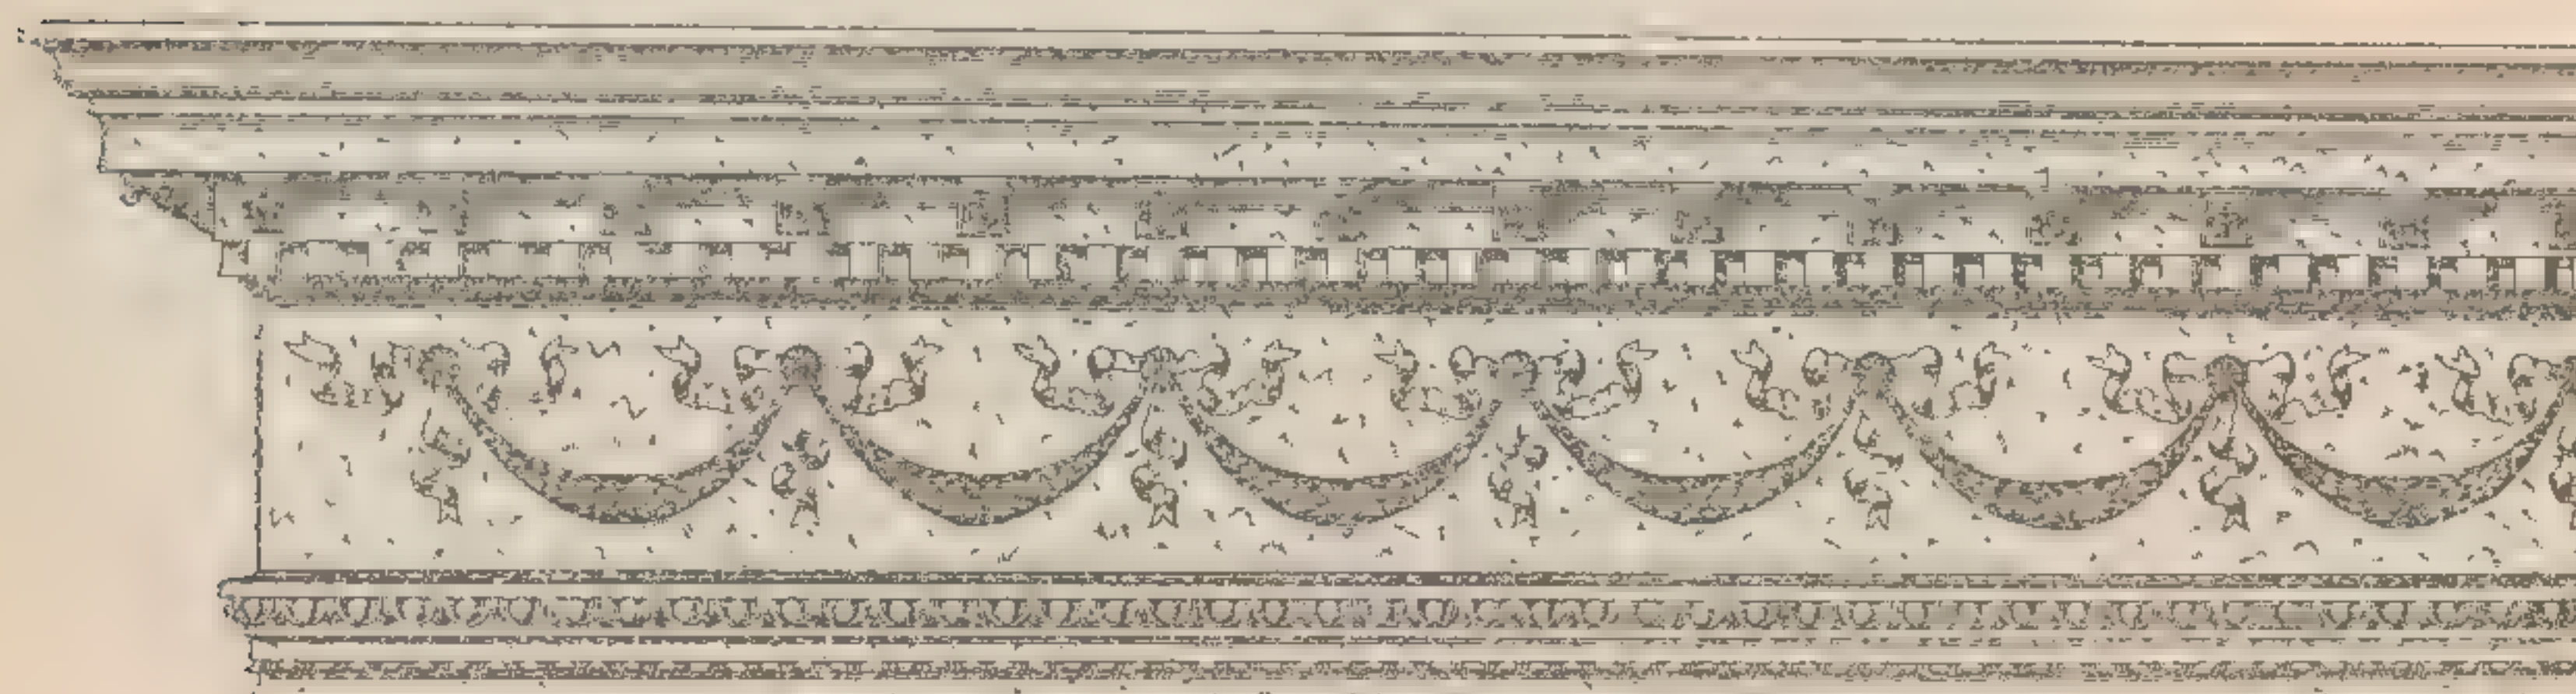

[COPYRIGHT]

Cornice

Sizes of Cornice on this page can be varied Prices for different sizes on application

Cornice No. 7000 Height 50 inches, projection 20 inches
Price, \$4.00 per foot, complete, in large sections, including wrought iron lookout Mitres, \$3.50 each

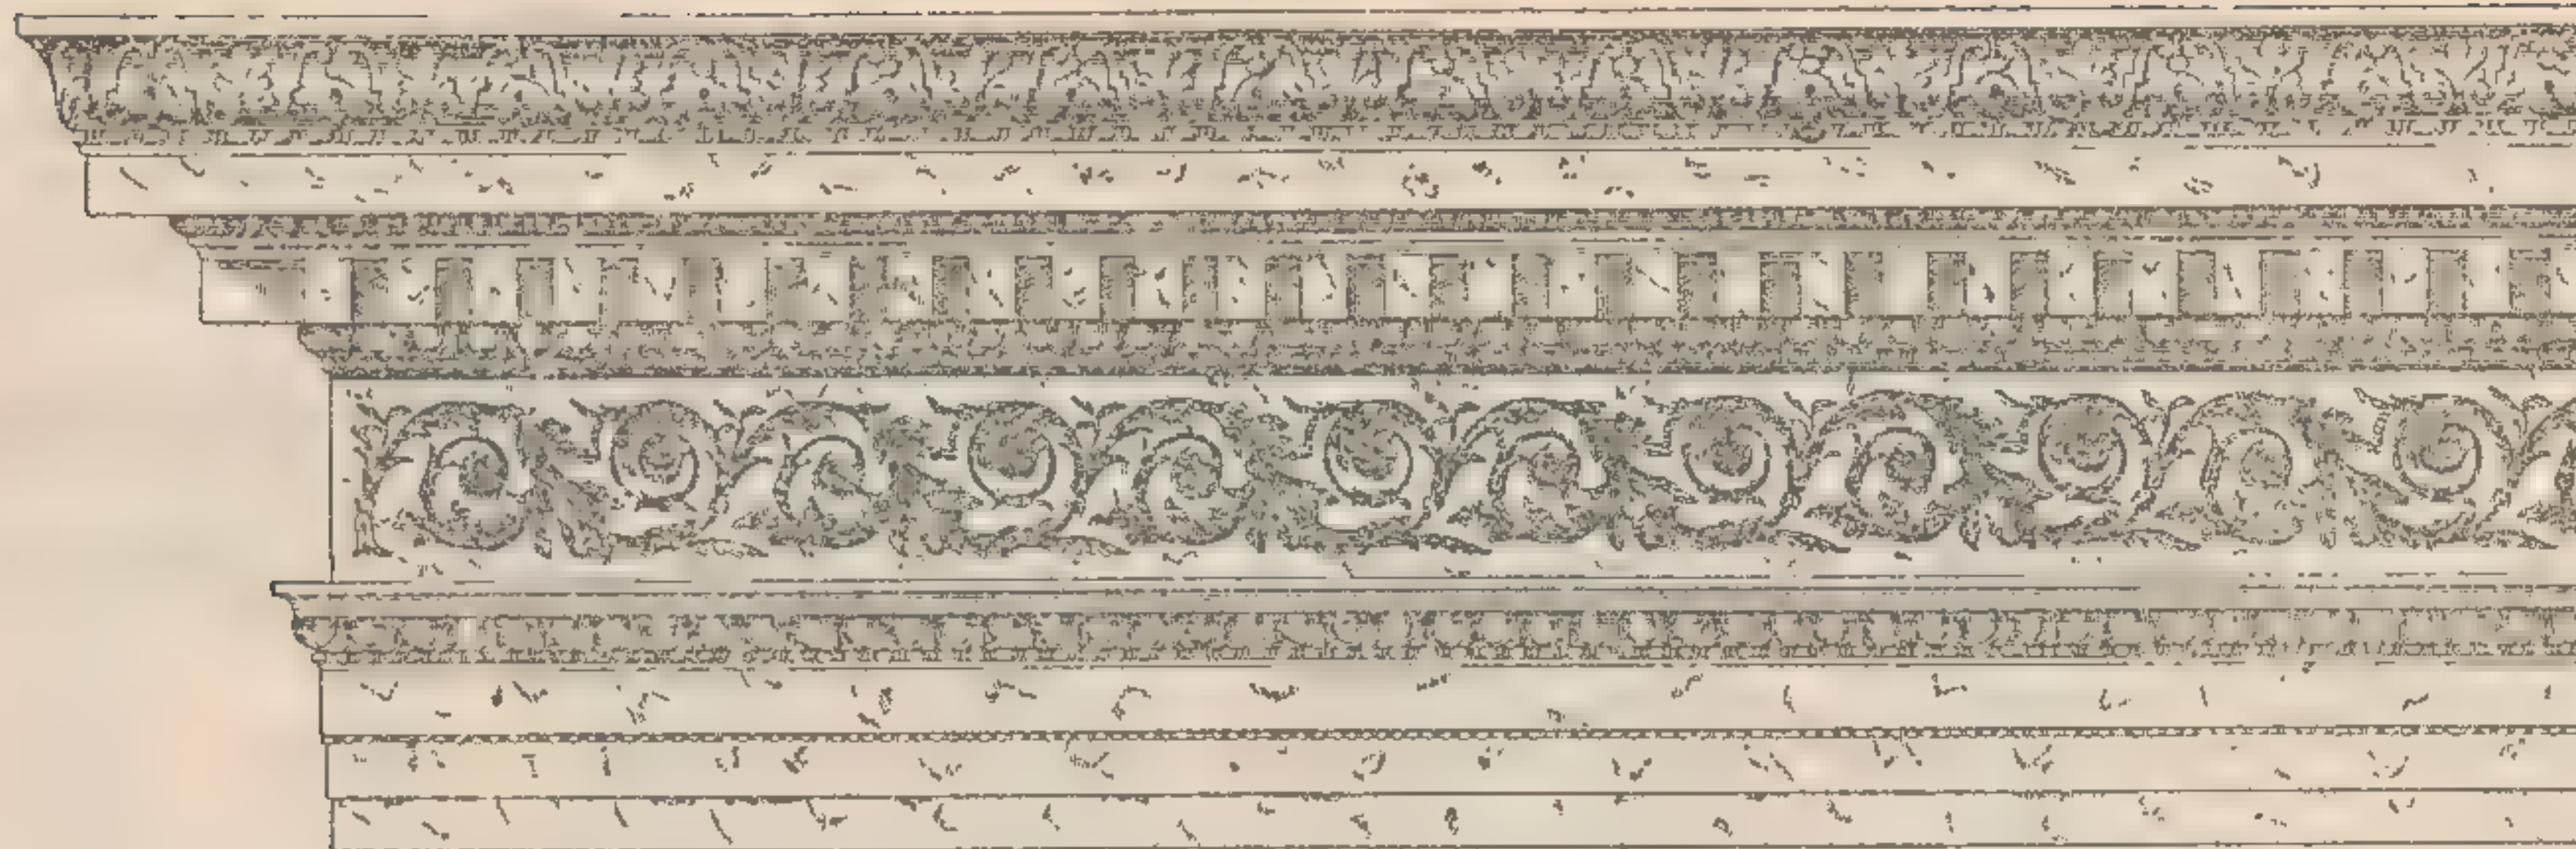

Cornice No. 7007. Height 30 inches, projection 11 inches.

Price, \$3.25 per foot, complete, in large sections, including wrought iron lookouts Mitres, \$1.25 each

The above Cornices made in copper are very beautiful, and while they will cost slightly more in this material than if made in Galvanized Iron, as priced above, they are sufficiently artistic and attractive to warrant expenditure. In copper these Cornices will last for ages. Prices of above in copper on application. Copper Cornices should not be painted, as when exposed to the weather for a short time it assumes a magnificent dark bronze color.—[COPYRIGHT.]

W. H. MULLINS, SALEM, OHIO. U. S. A

Cornice.

Cornice No. 7002. Height 40 inches, projection 16 inches.
Price, \$3.50 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$2.00 each.

[COPYRIGHT]

Cornice No. 7003. Height 50 inches, projection 26 inches.
Price, \$5.50 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$3.00 each.

The above Cornices made in copper are very beautiful and effective, and I will gladly make estimate for reproducing either of the above in copper on receipt of plan of building showing amount required.

Copper Cornice assumes a rich antique bronze color, which greatly lengthens the artistic effect of building. Use copper wherever possible, as it will last for ages.

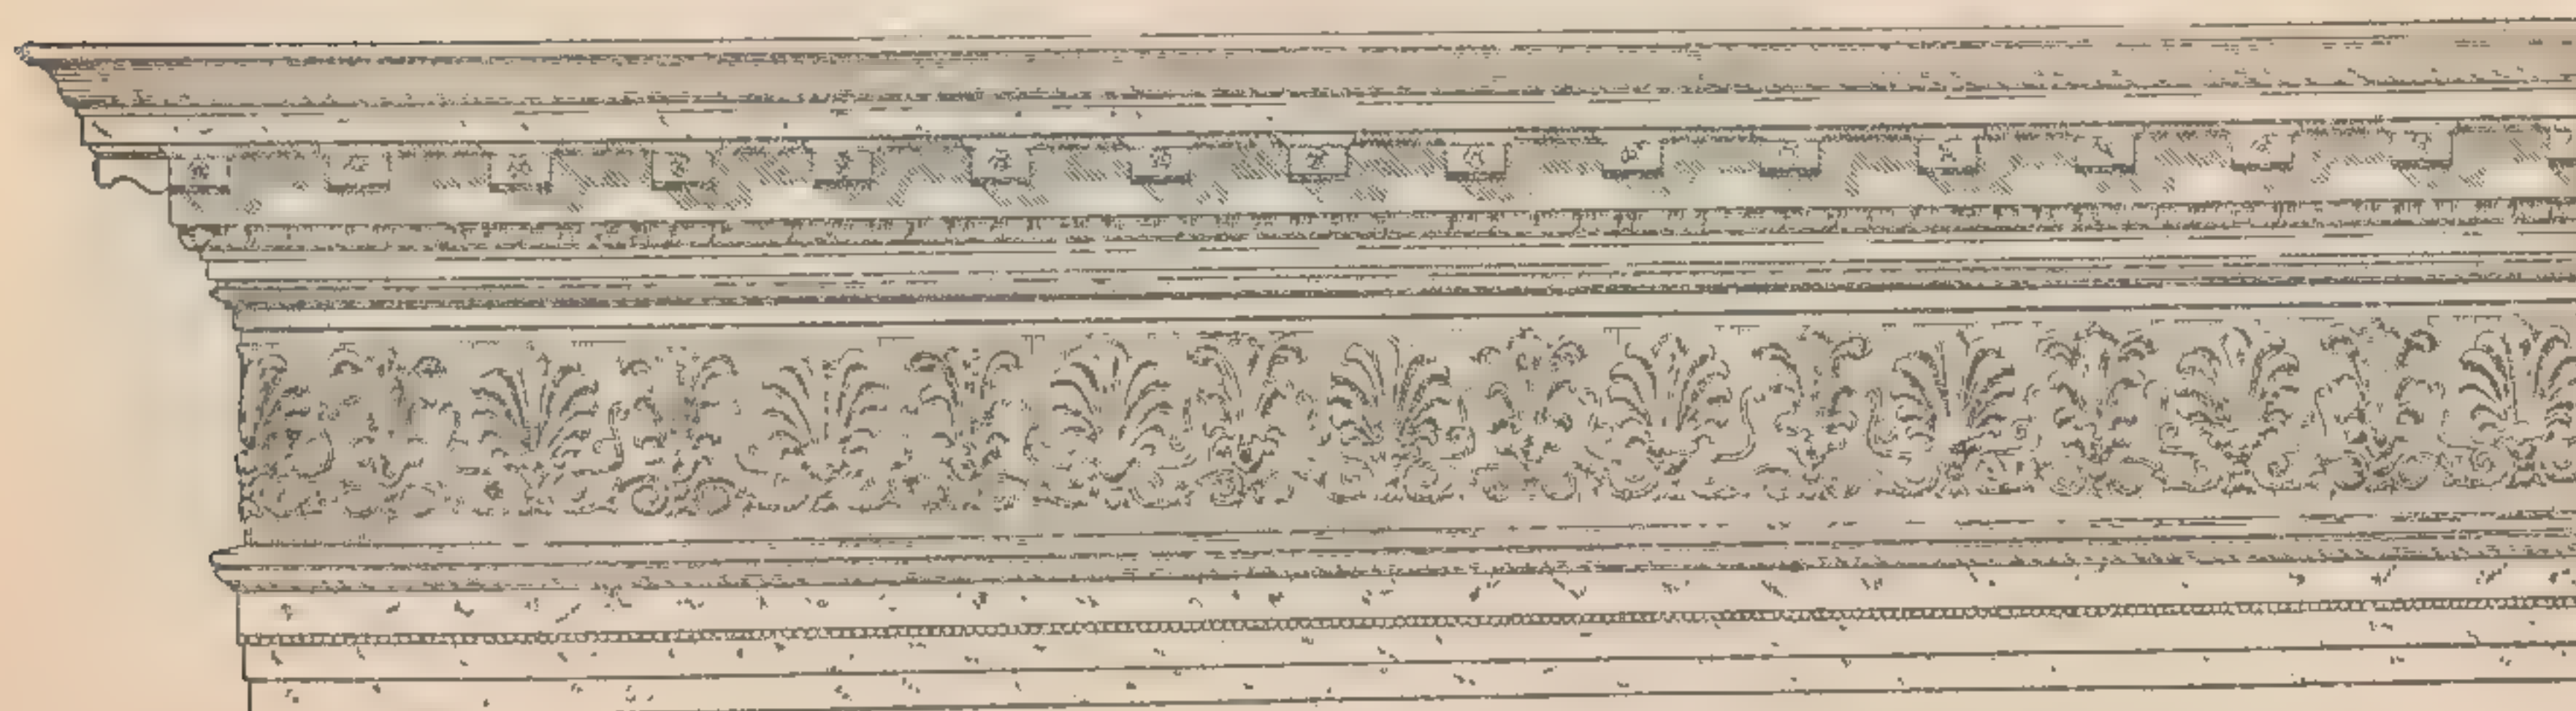

W. H. MULLINS, SALEM, OHIO, U. S. A.

Cornice.

Cornice No. 7011. Height 52 inches, projection 23 inches.

Price, \$4.50 per foot, complete, in large sections, including wrought iron lookouts. Mitres, \$2.75 each.

Cornice No. 7005. Height 31 inches, projection 11 inches.

Price, \$2.50 per foot, complete, in sections, including wrought iron lookouts. Mitres \$1.75 each.

Prices of above Cornices made in copper on application. Copper Cornices are almost indestructible. The dark bronze color they assume when exposed to the weather a short time greatly heightens the artistic effect of the building.

Dear Sir

I wish to inform you that

I am suffering from blood poisoning & my
~~right~~ foot, the result of a small cut in my right foot.

In consequence ^{of which} I will not be able to attend
to my work for several days, so my physician
informs me. I hope it will not be for long.
